

Produced

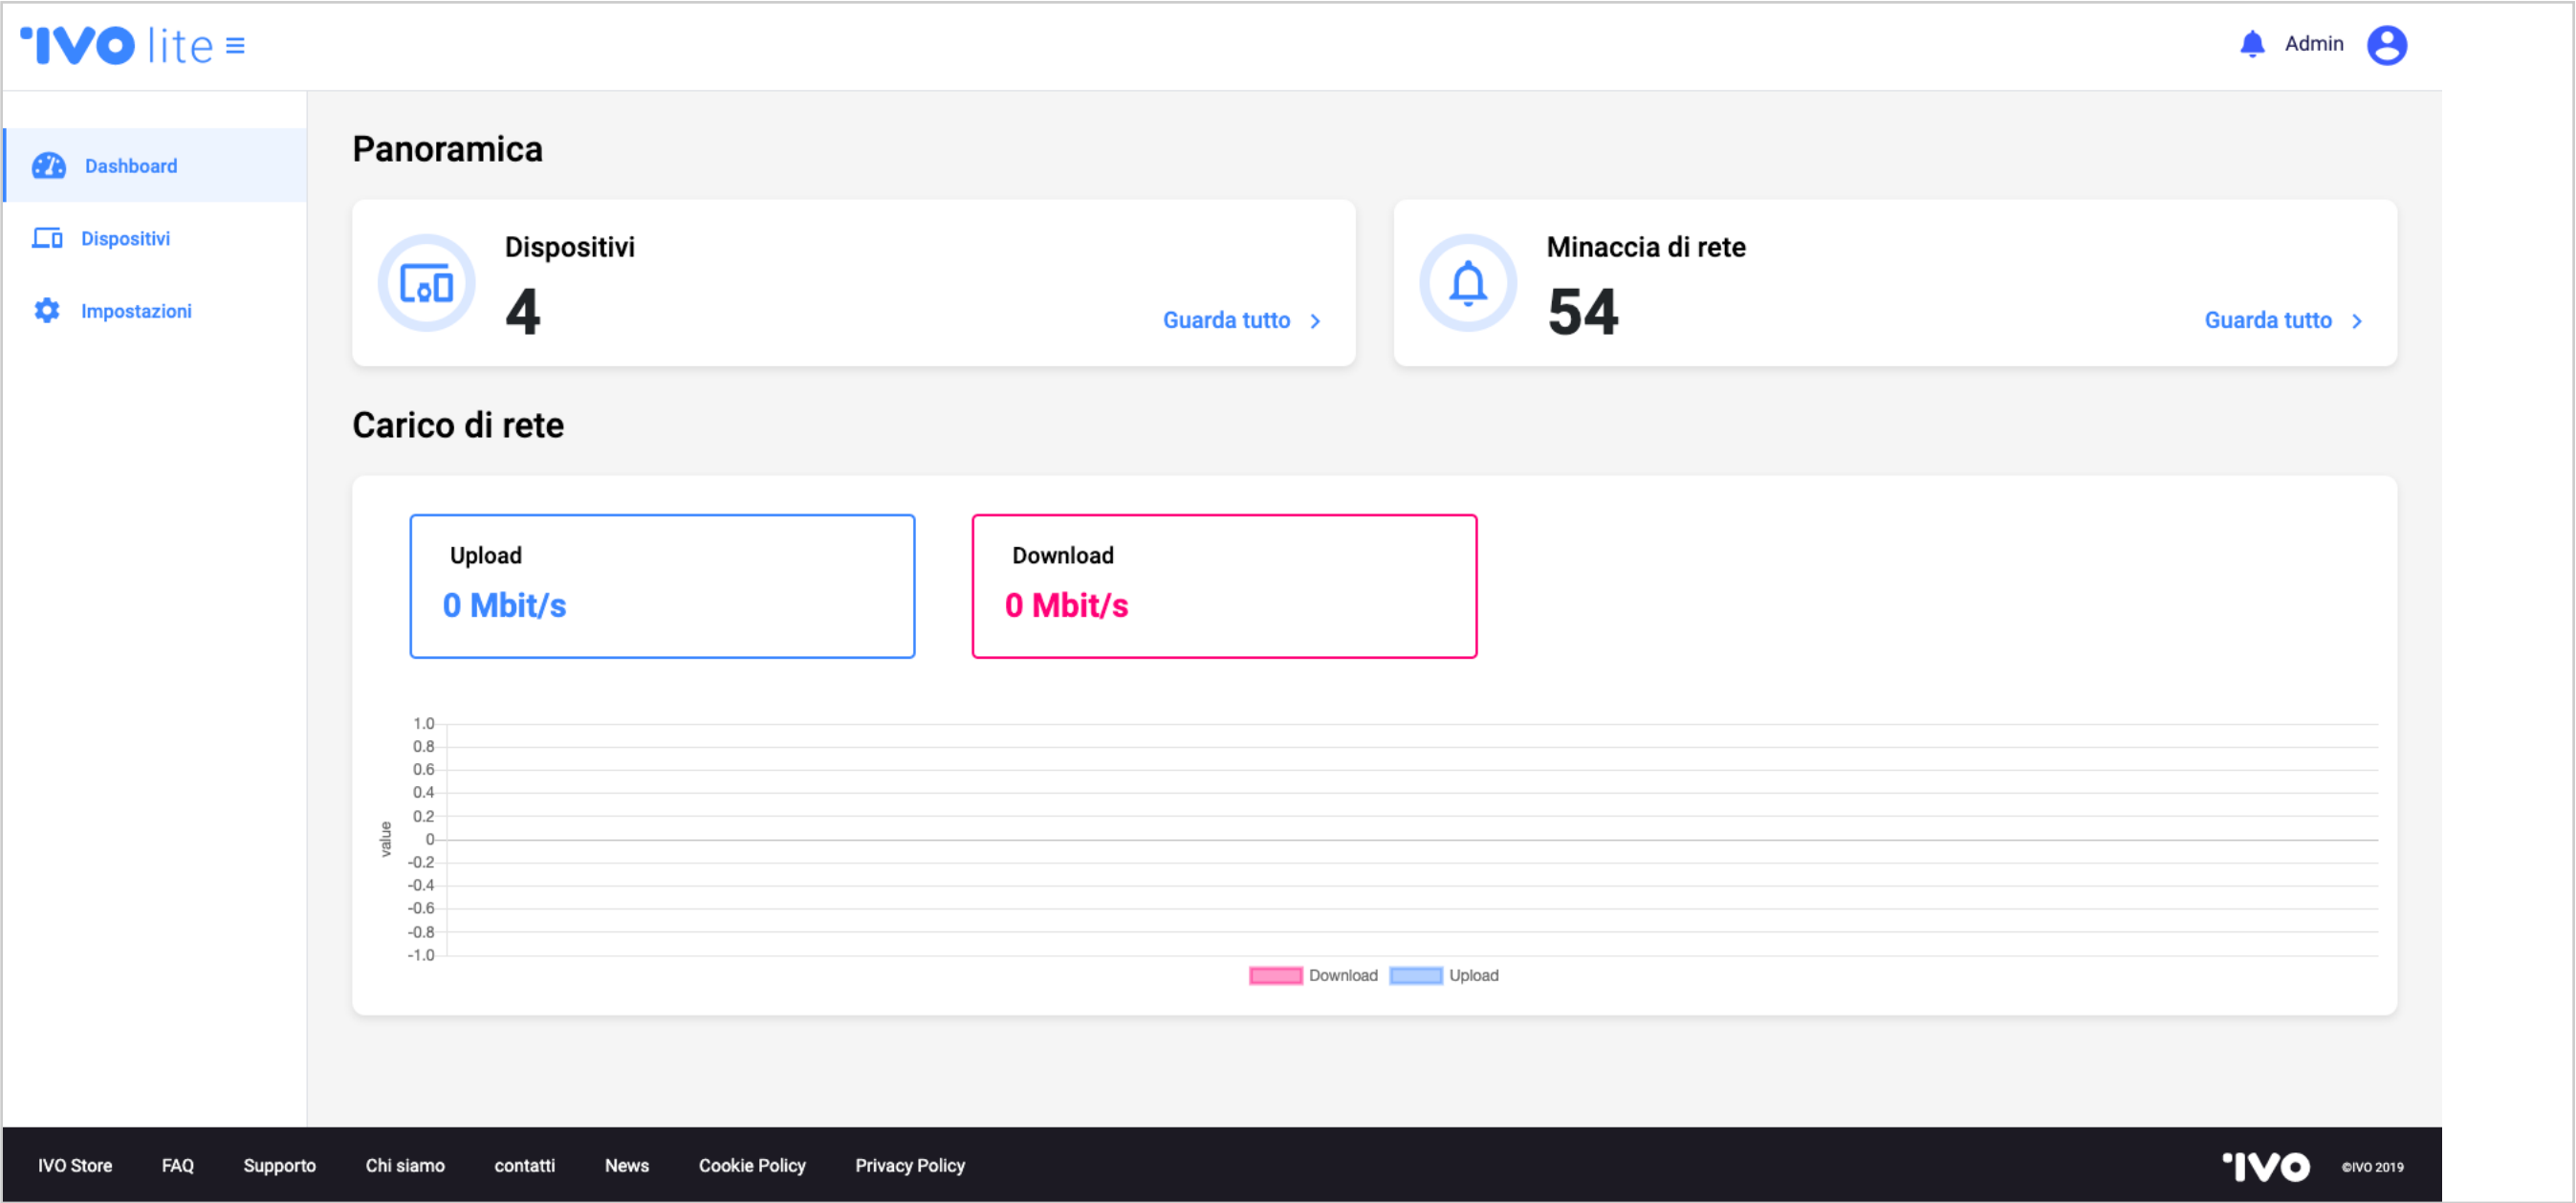

Corrections:

- Change logo color
- The color of the buttons is: Hex #3B86FF - RGB 59/134/255
- The background is: Hex #3D5AFE - RGB 61/90/254
- Container is non-rectangular square
- The welcome phrase is missing
- Missing title above text cell
- Keep the same language throughout the page

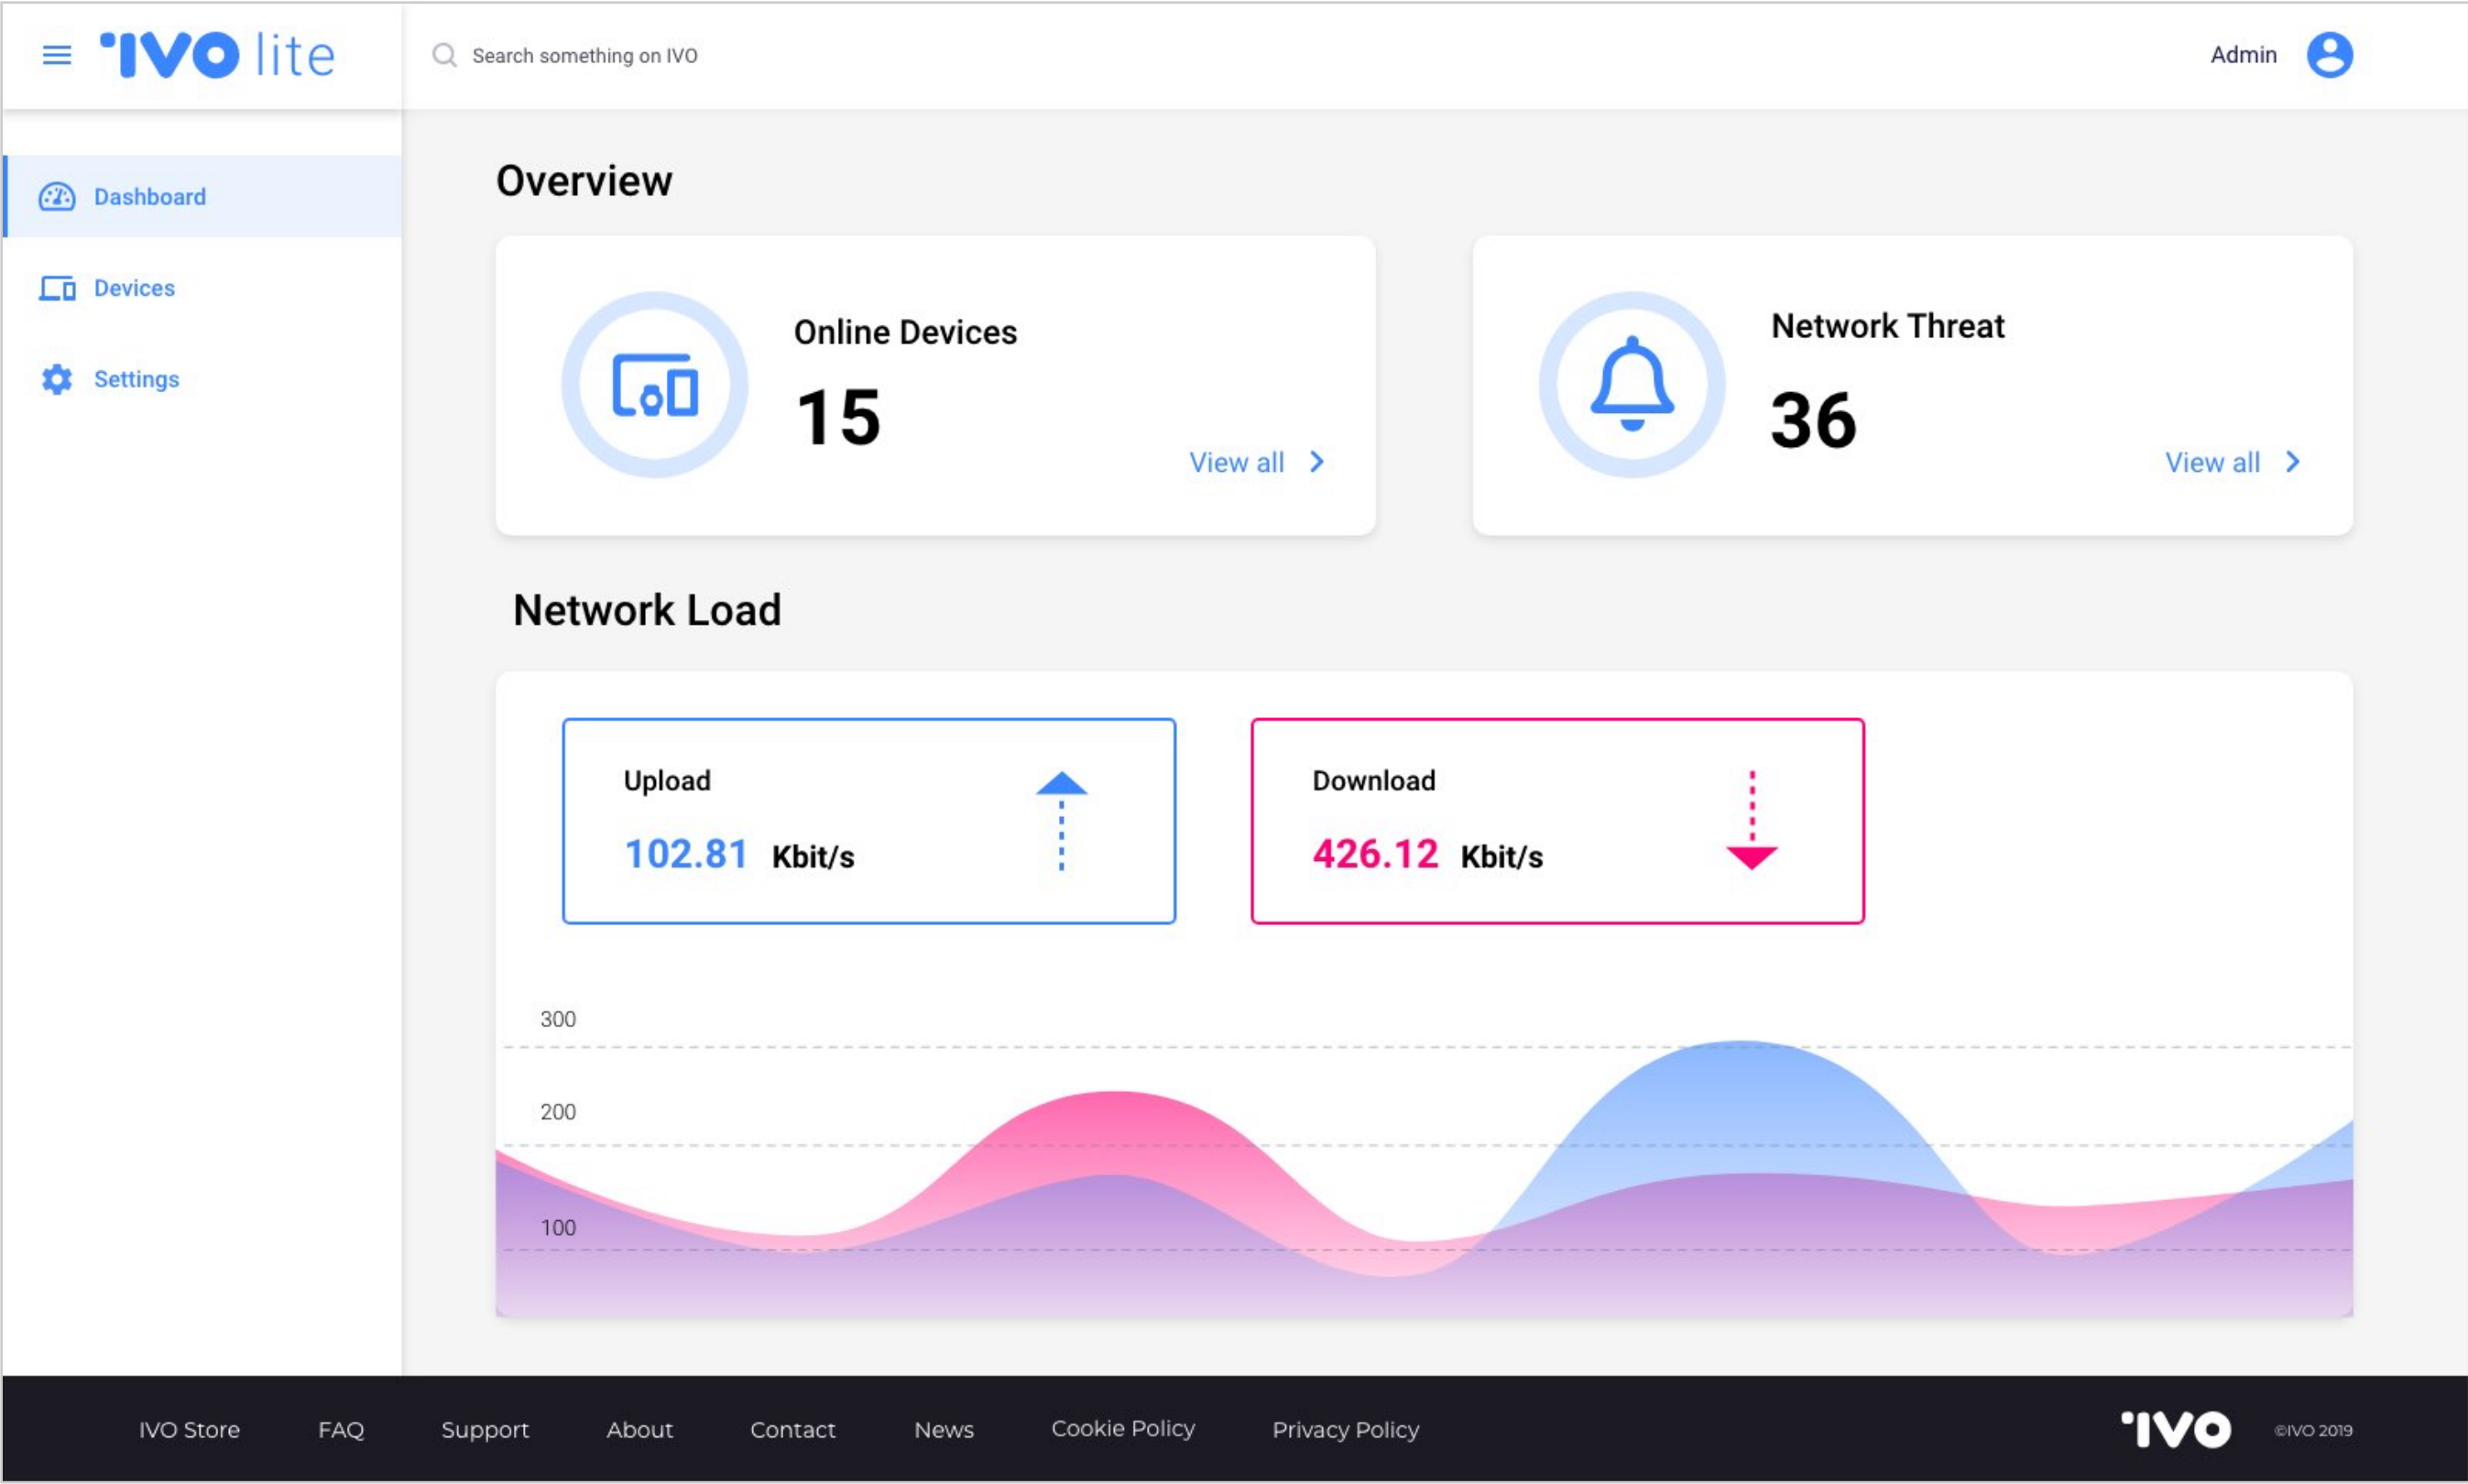

Original layout

Produced

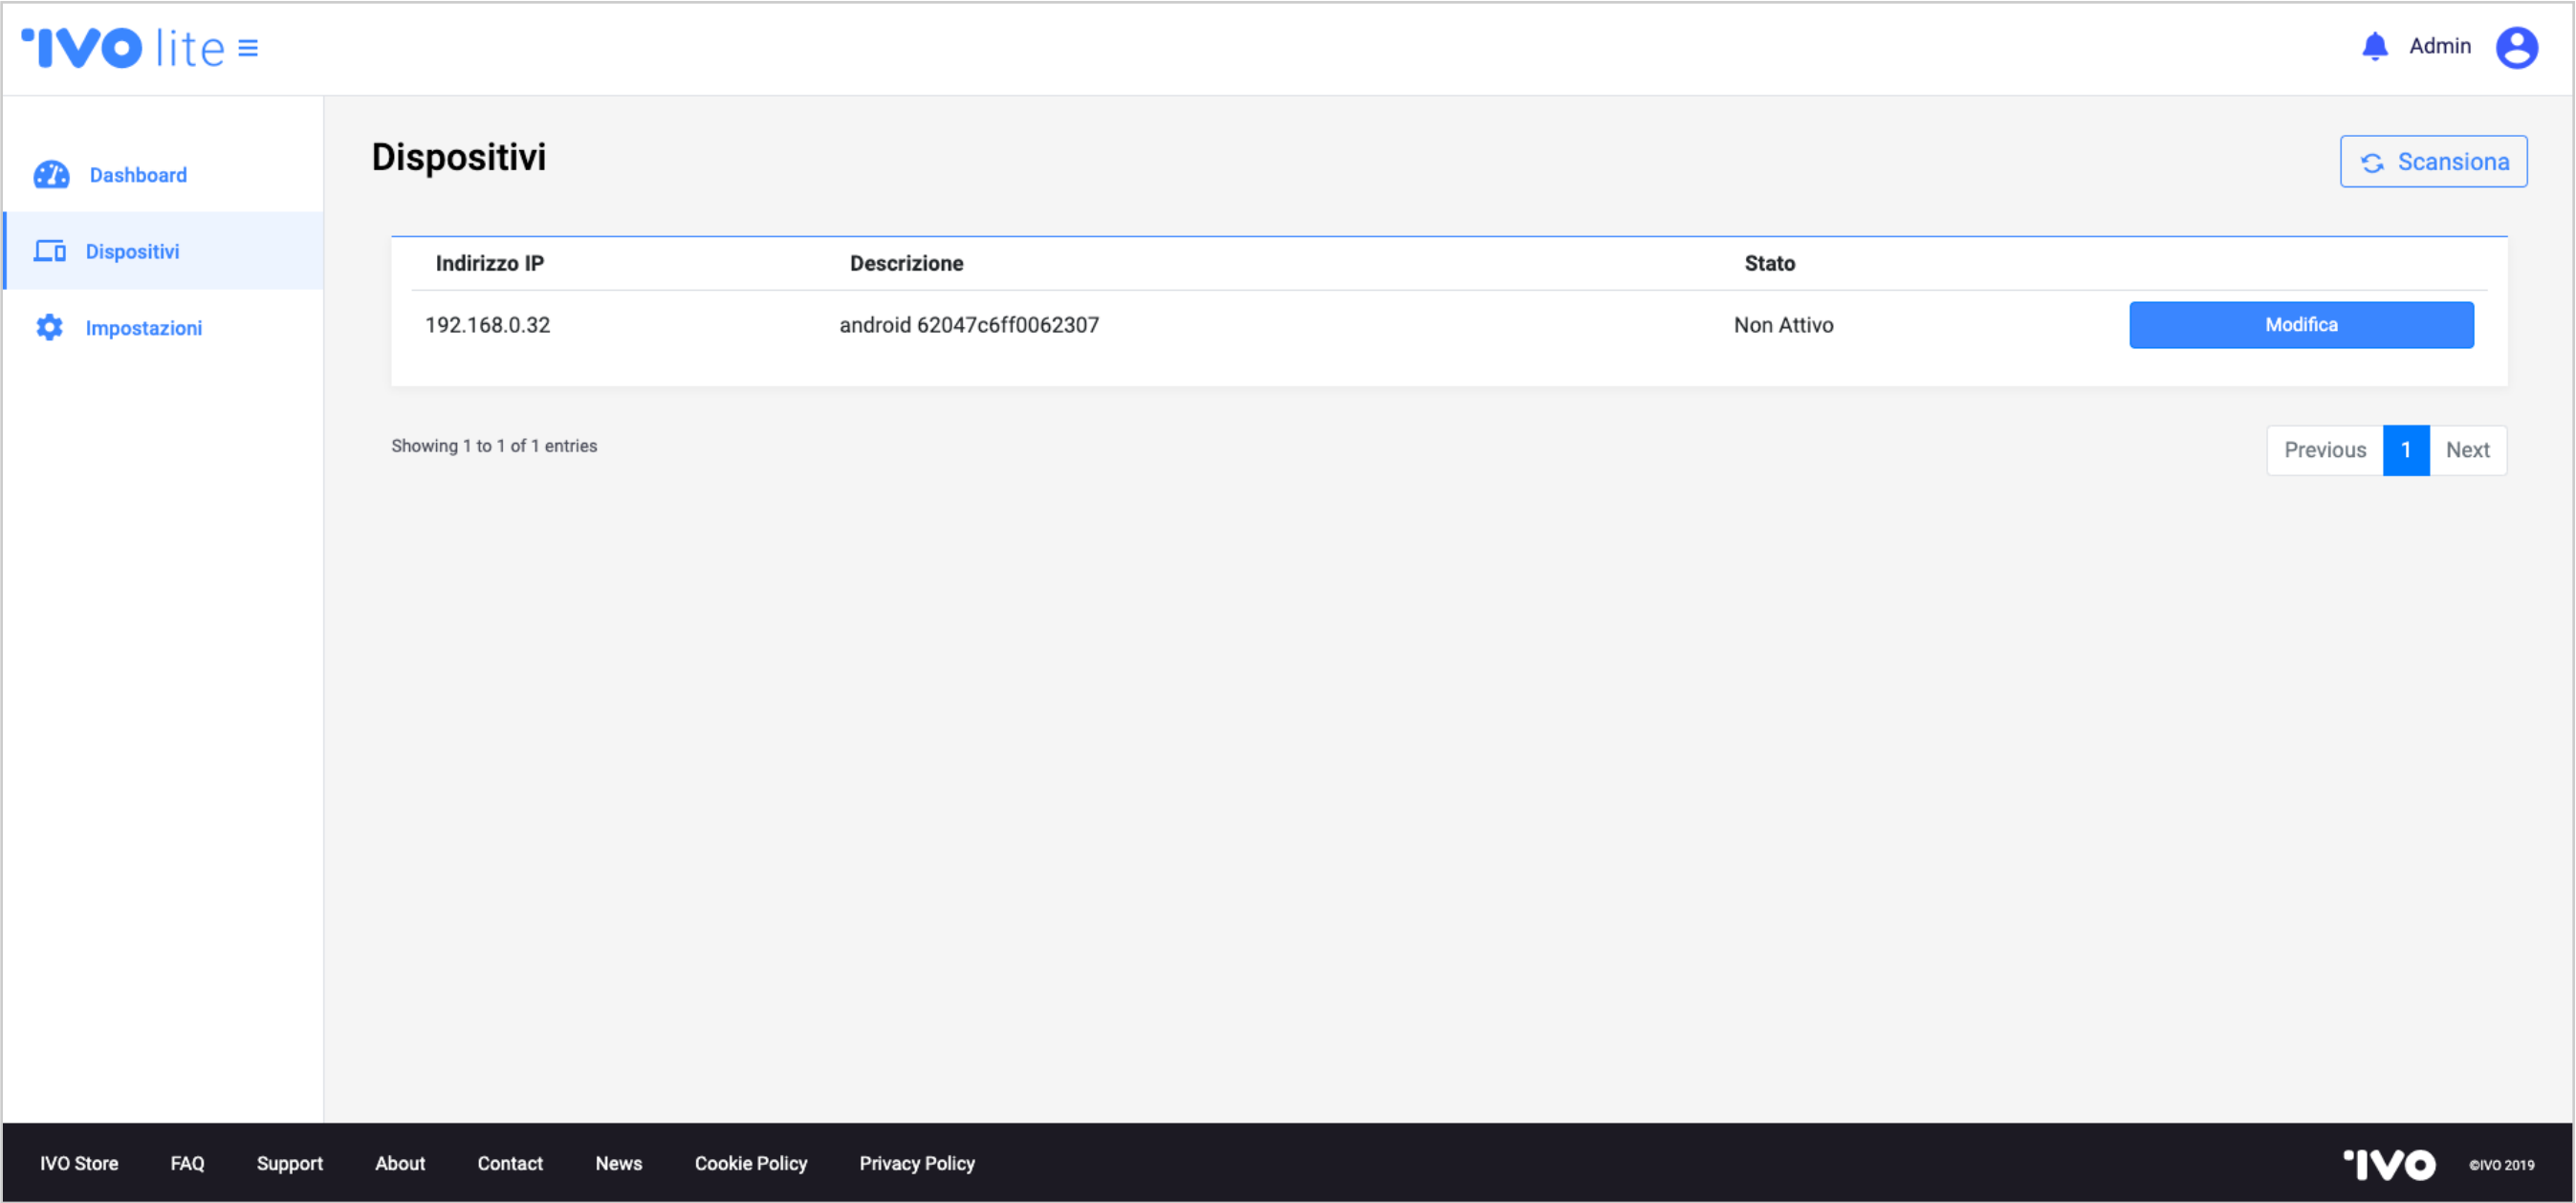

Original layout

Corrections:

- The logo should be put smaller (it was also wrong in the original)
- The hamburger icon is good to be on the right of the logo but must be aligned with the box of the open sidebar
- The icons are wrong because they are full and not empty as in the original. They can be changed with those of material icon.
- Align the lettering with the circles containing the icon in “overview”.
- The “search” is right that there is no

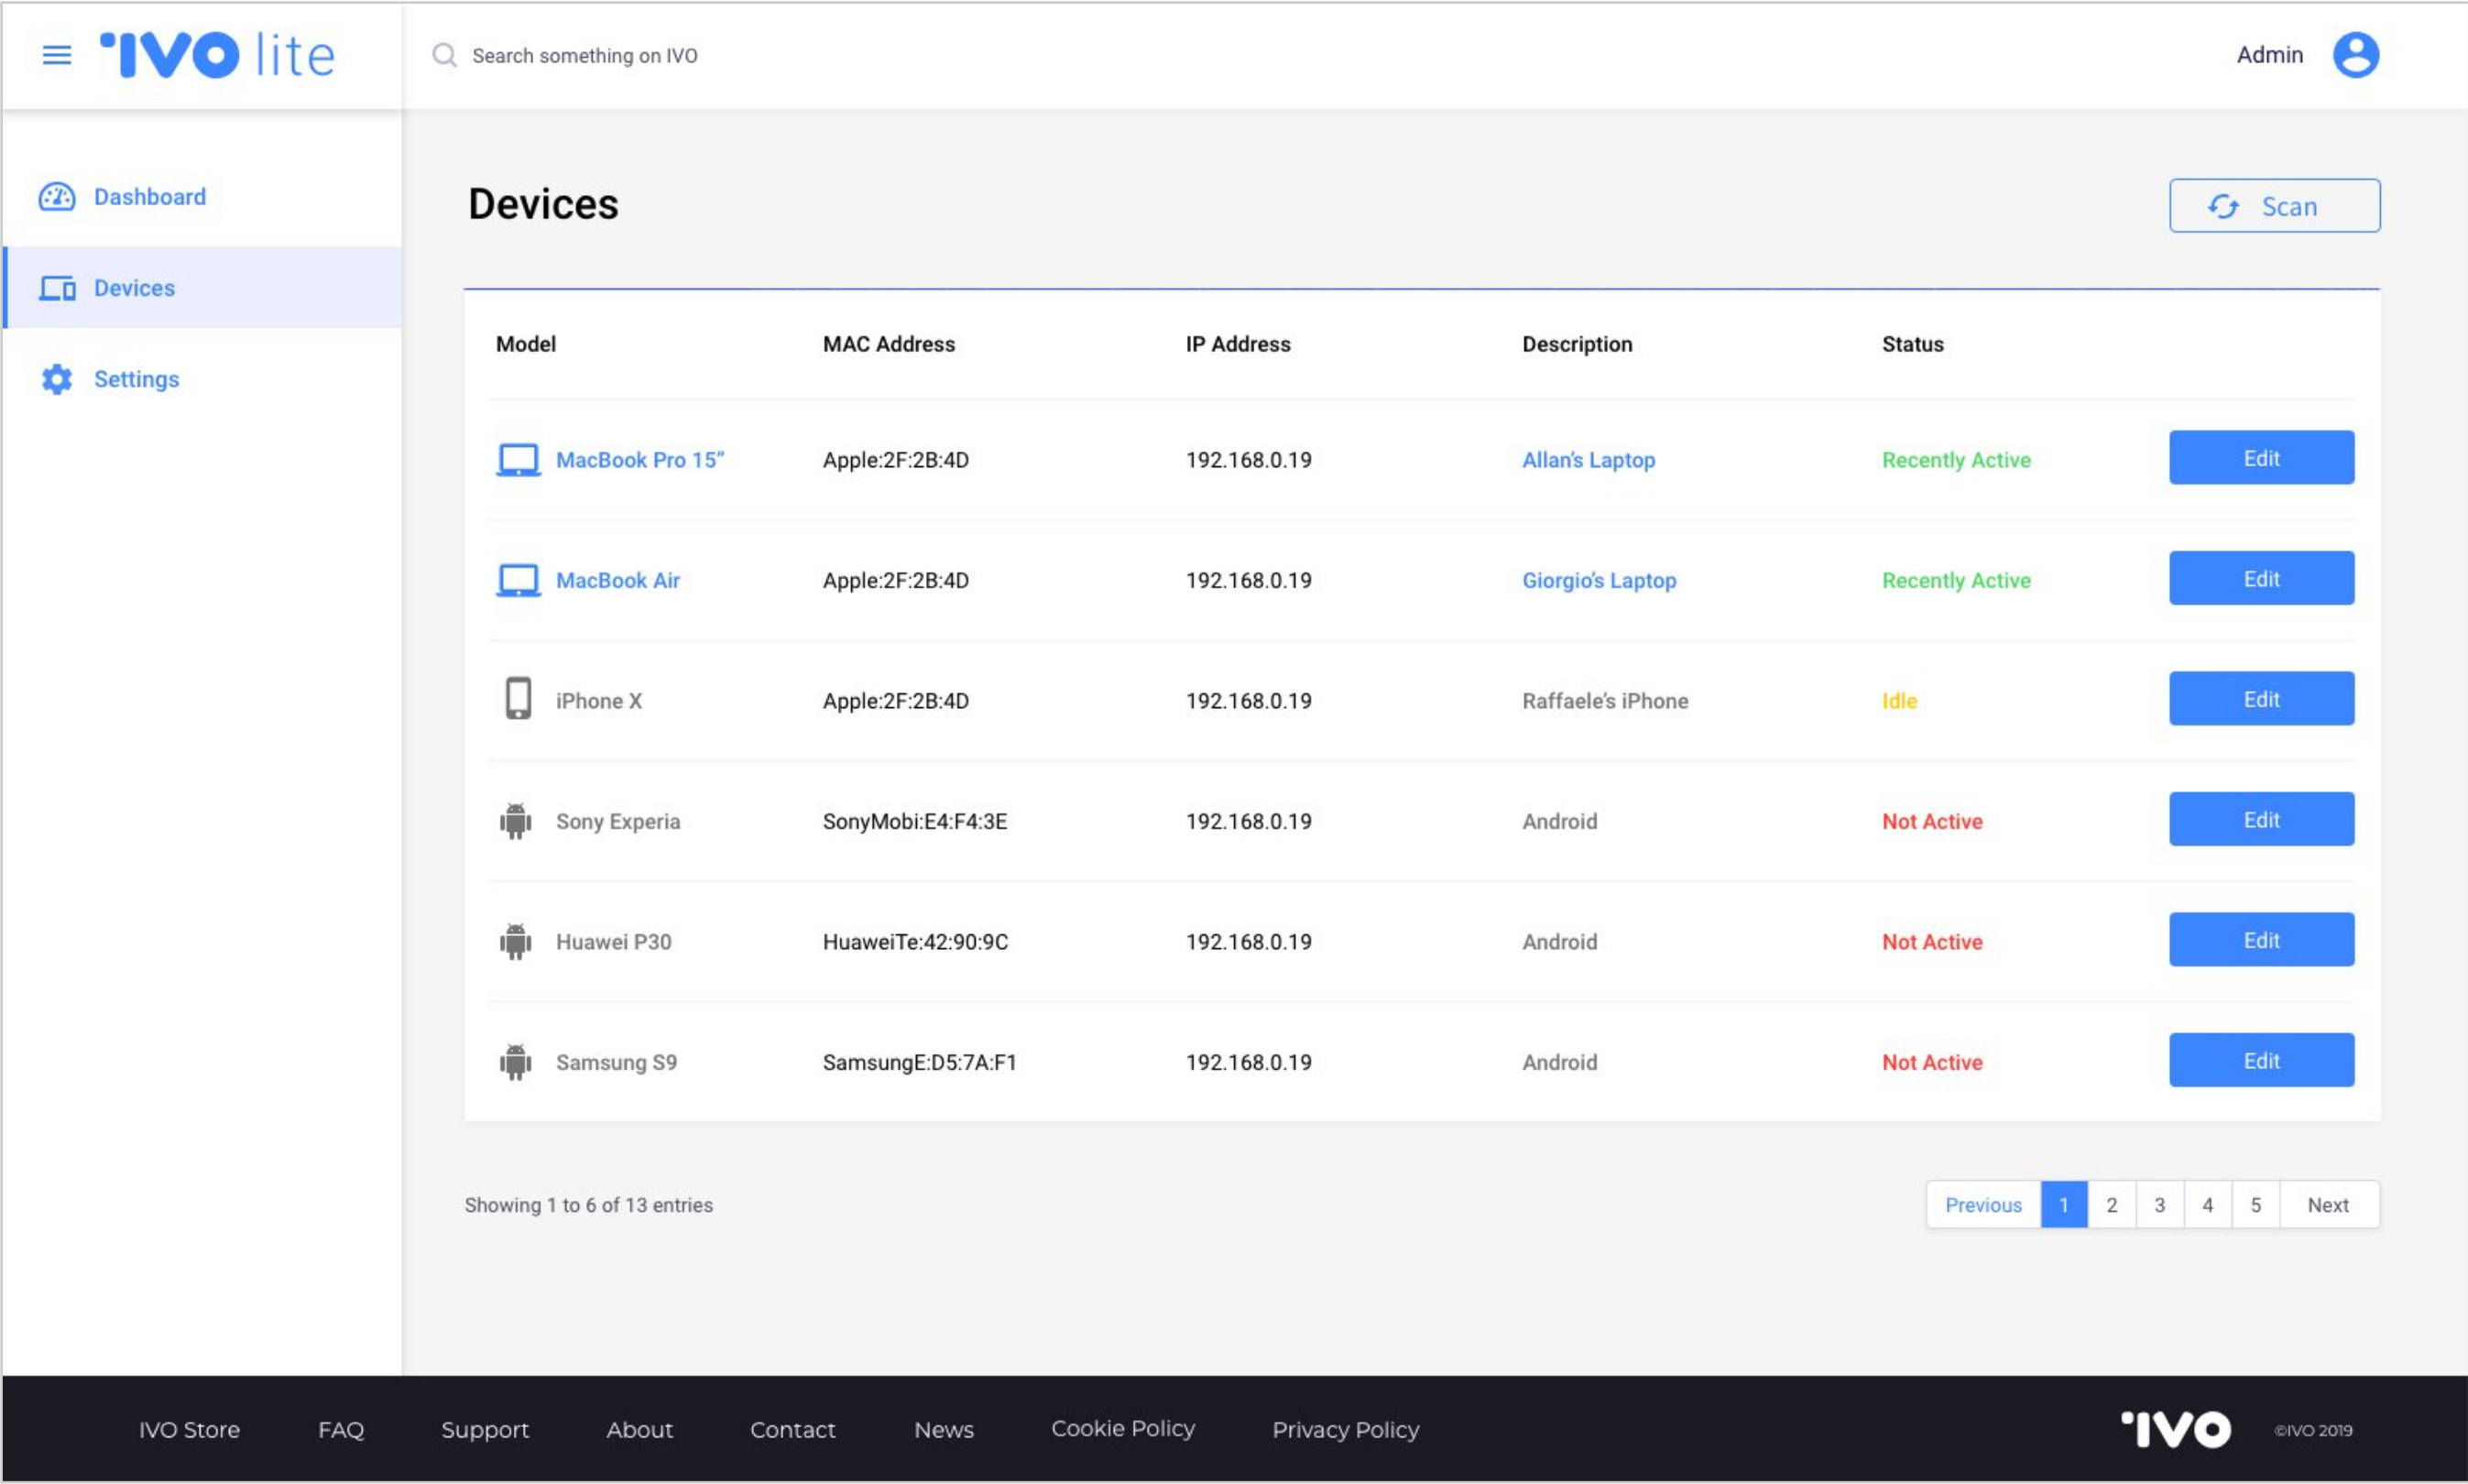

Produced

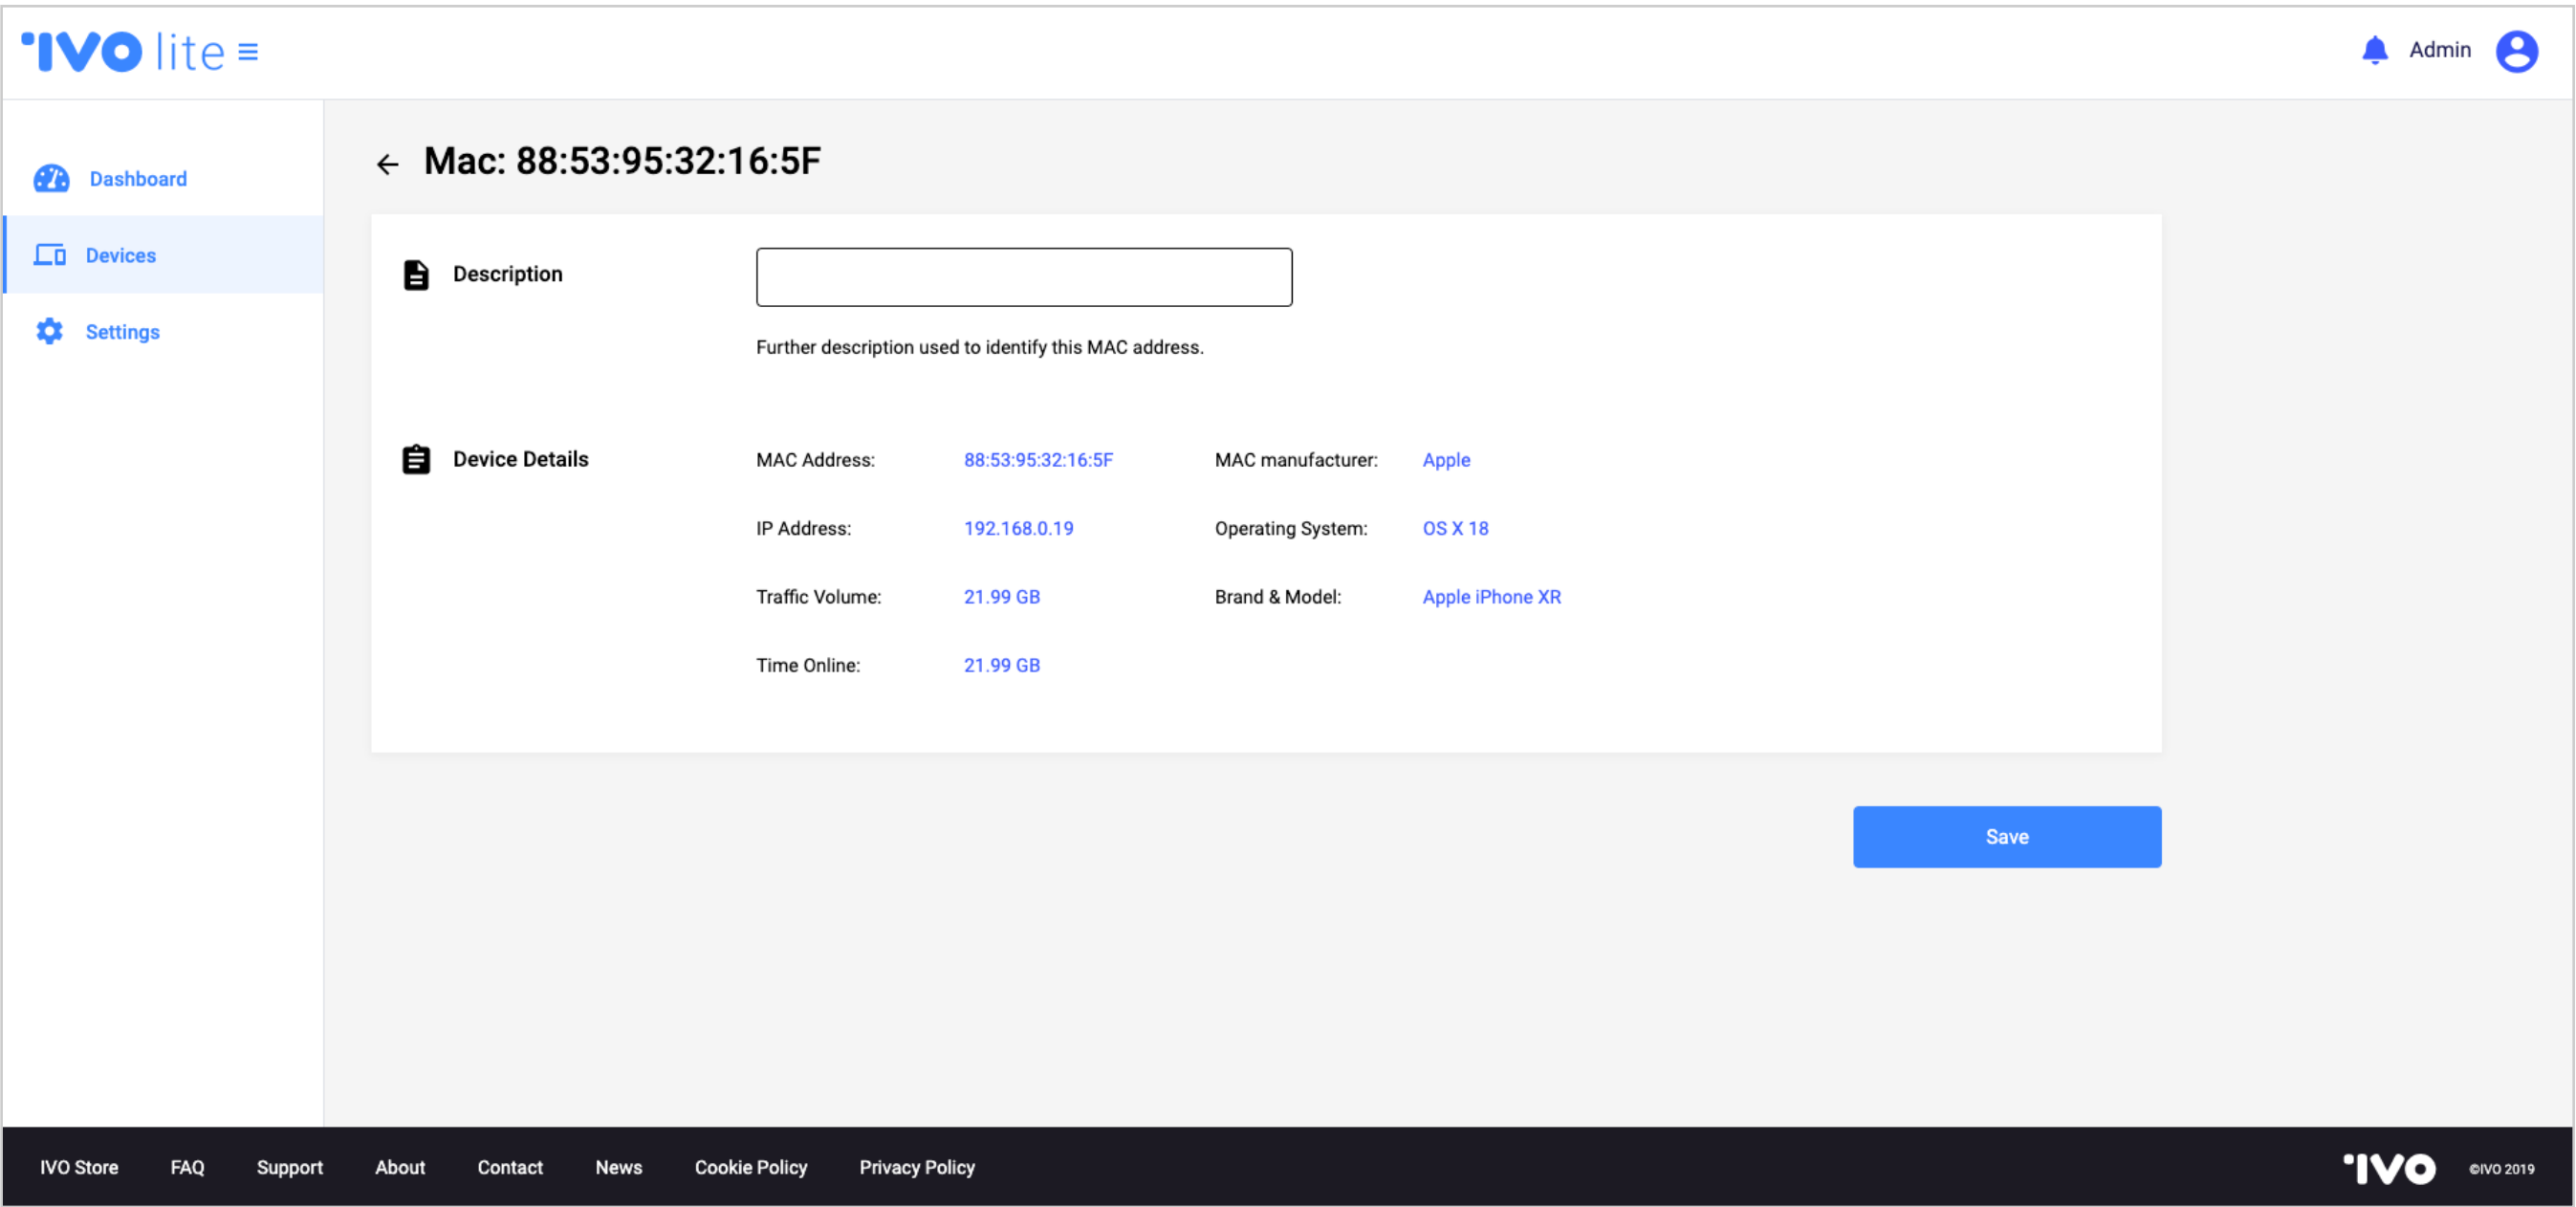

Corrections:

- Table entries are incorrect and not correctly aligned
- The page title should be aligned with the table
- The buttons are too big

Original layout

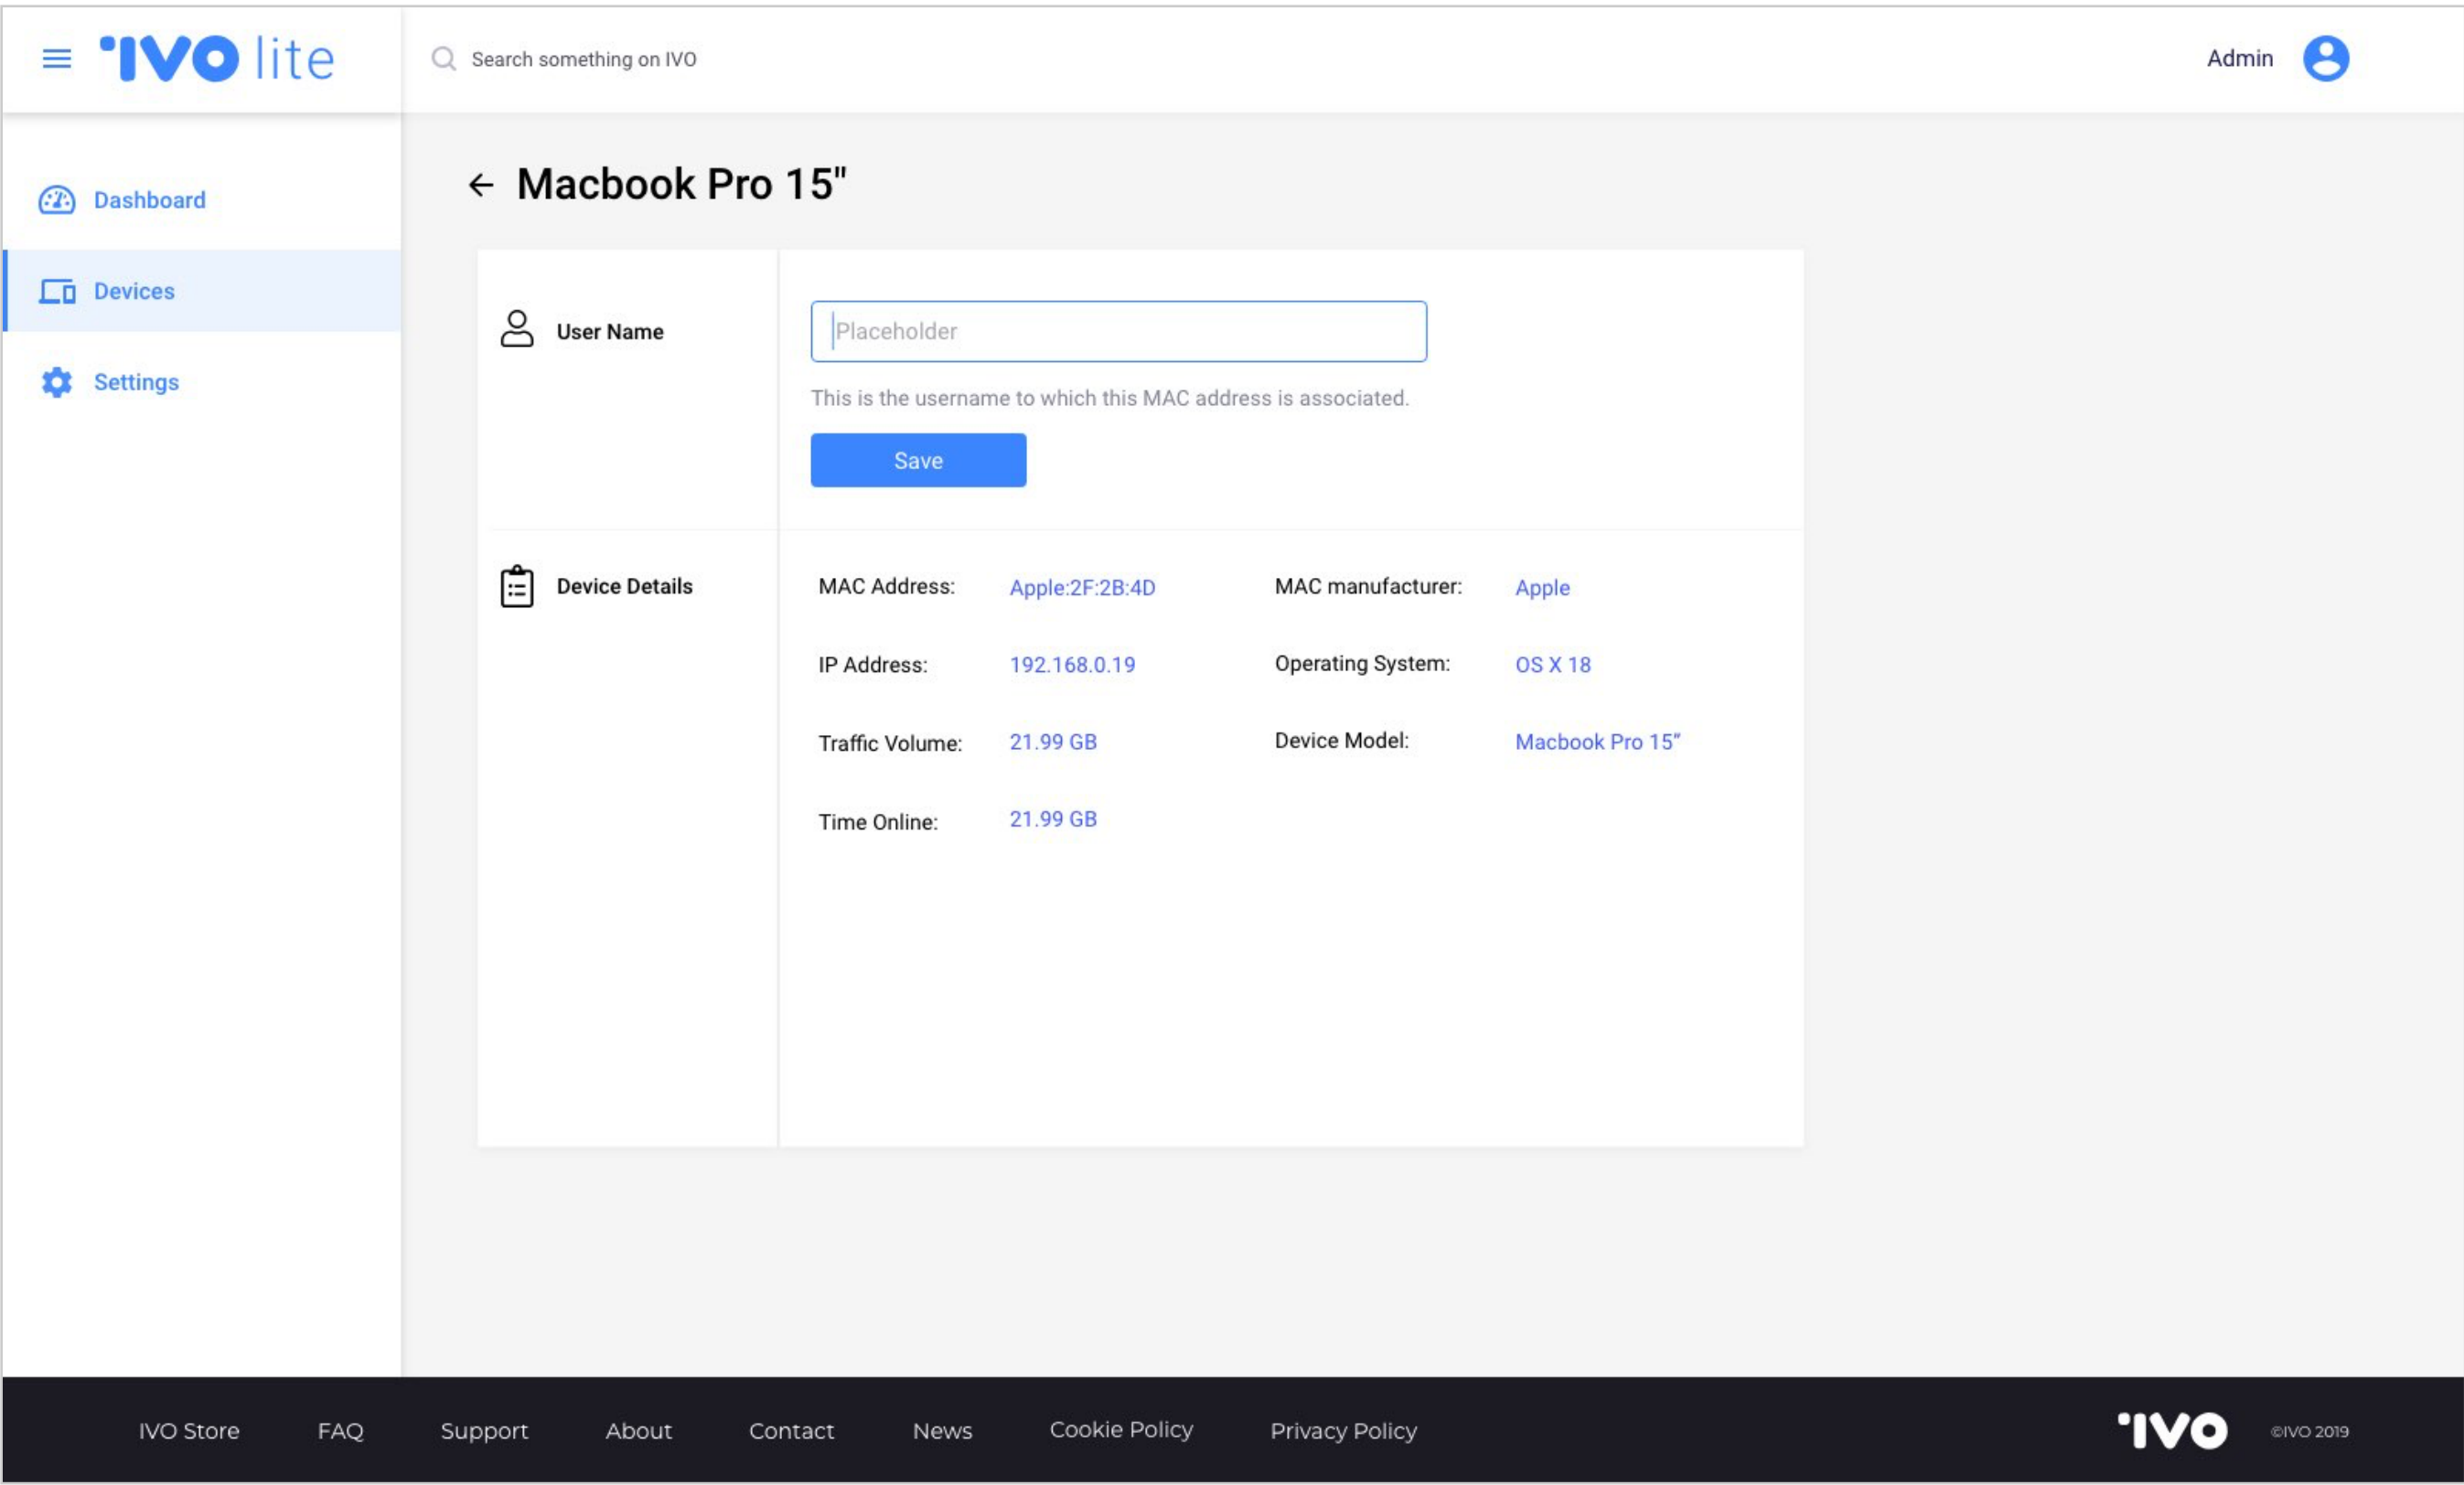

Produced

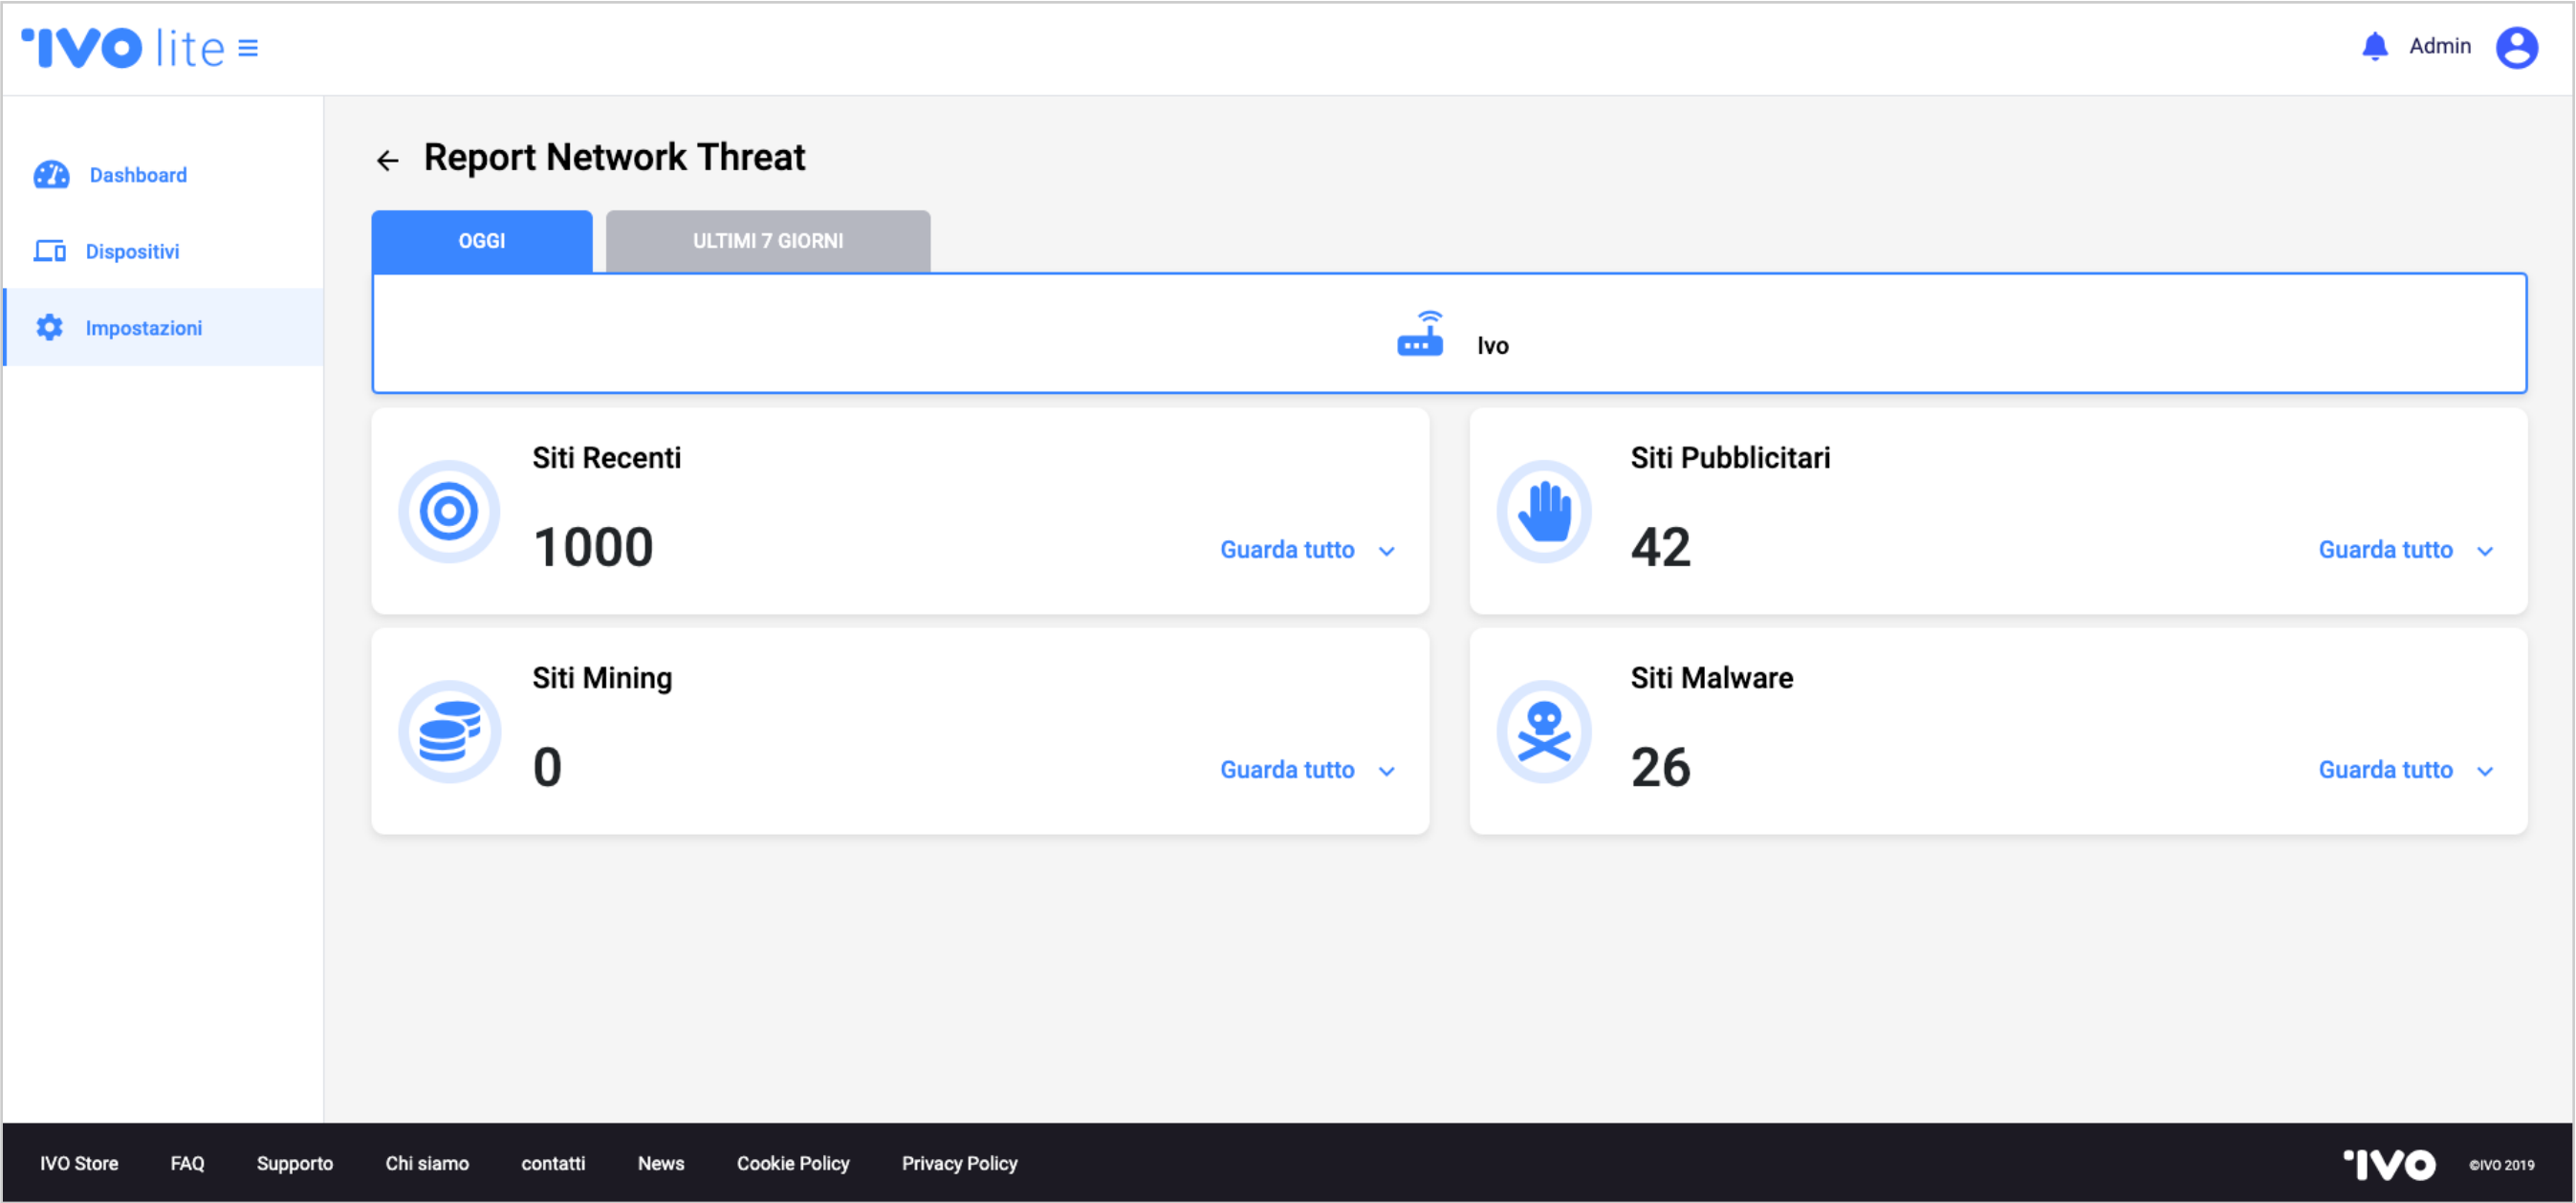

Corrections:

- In the title of the page should be put the model name
- The original icons are empty
- If you can only assign a description ok also the wording technically is wrong
- The edge of the text cell should be lightened because it is not full black

Original layout

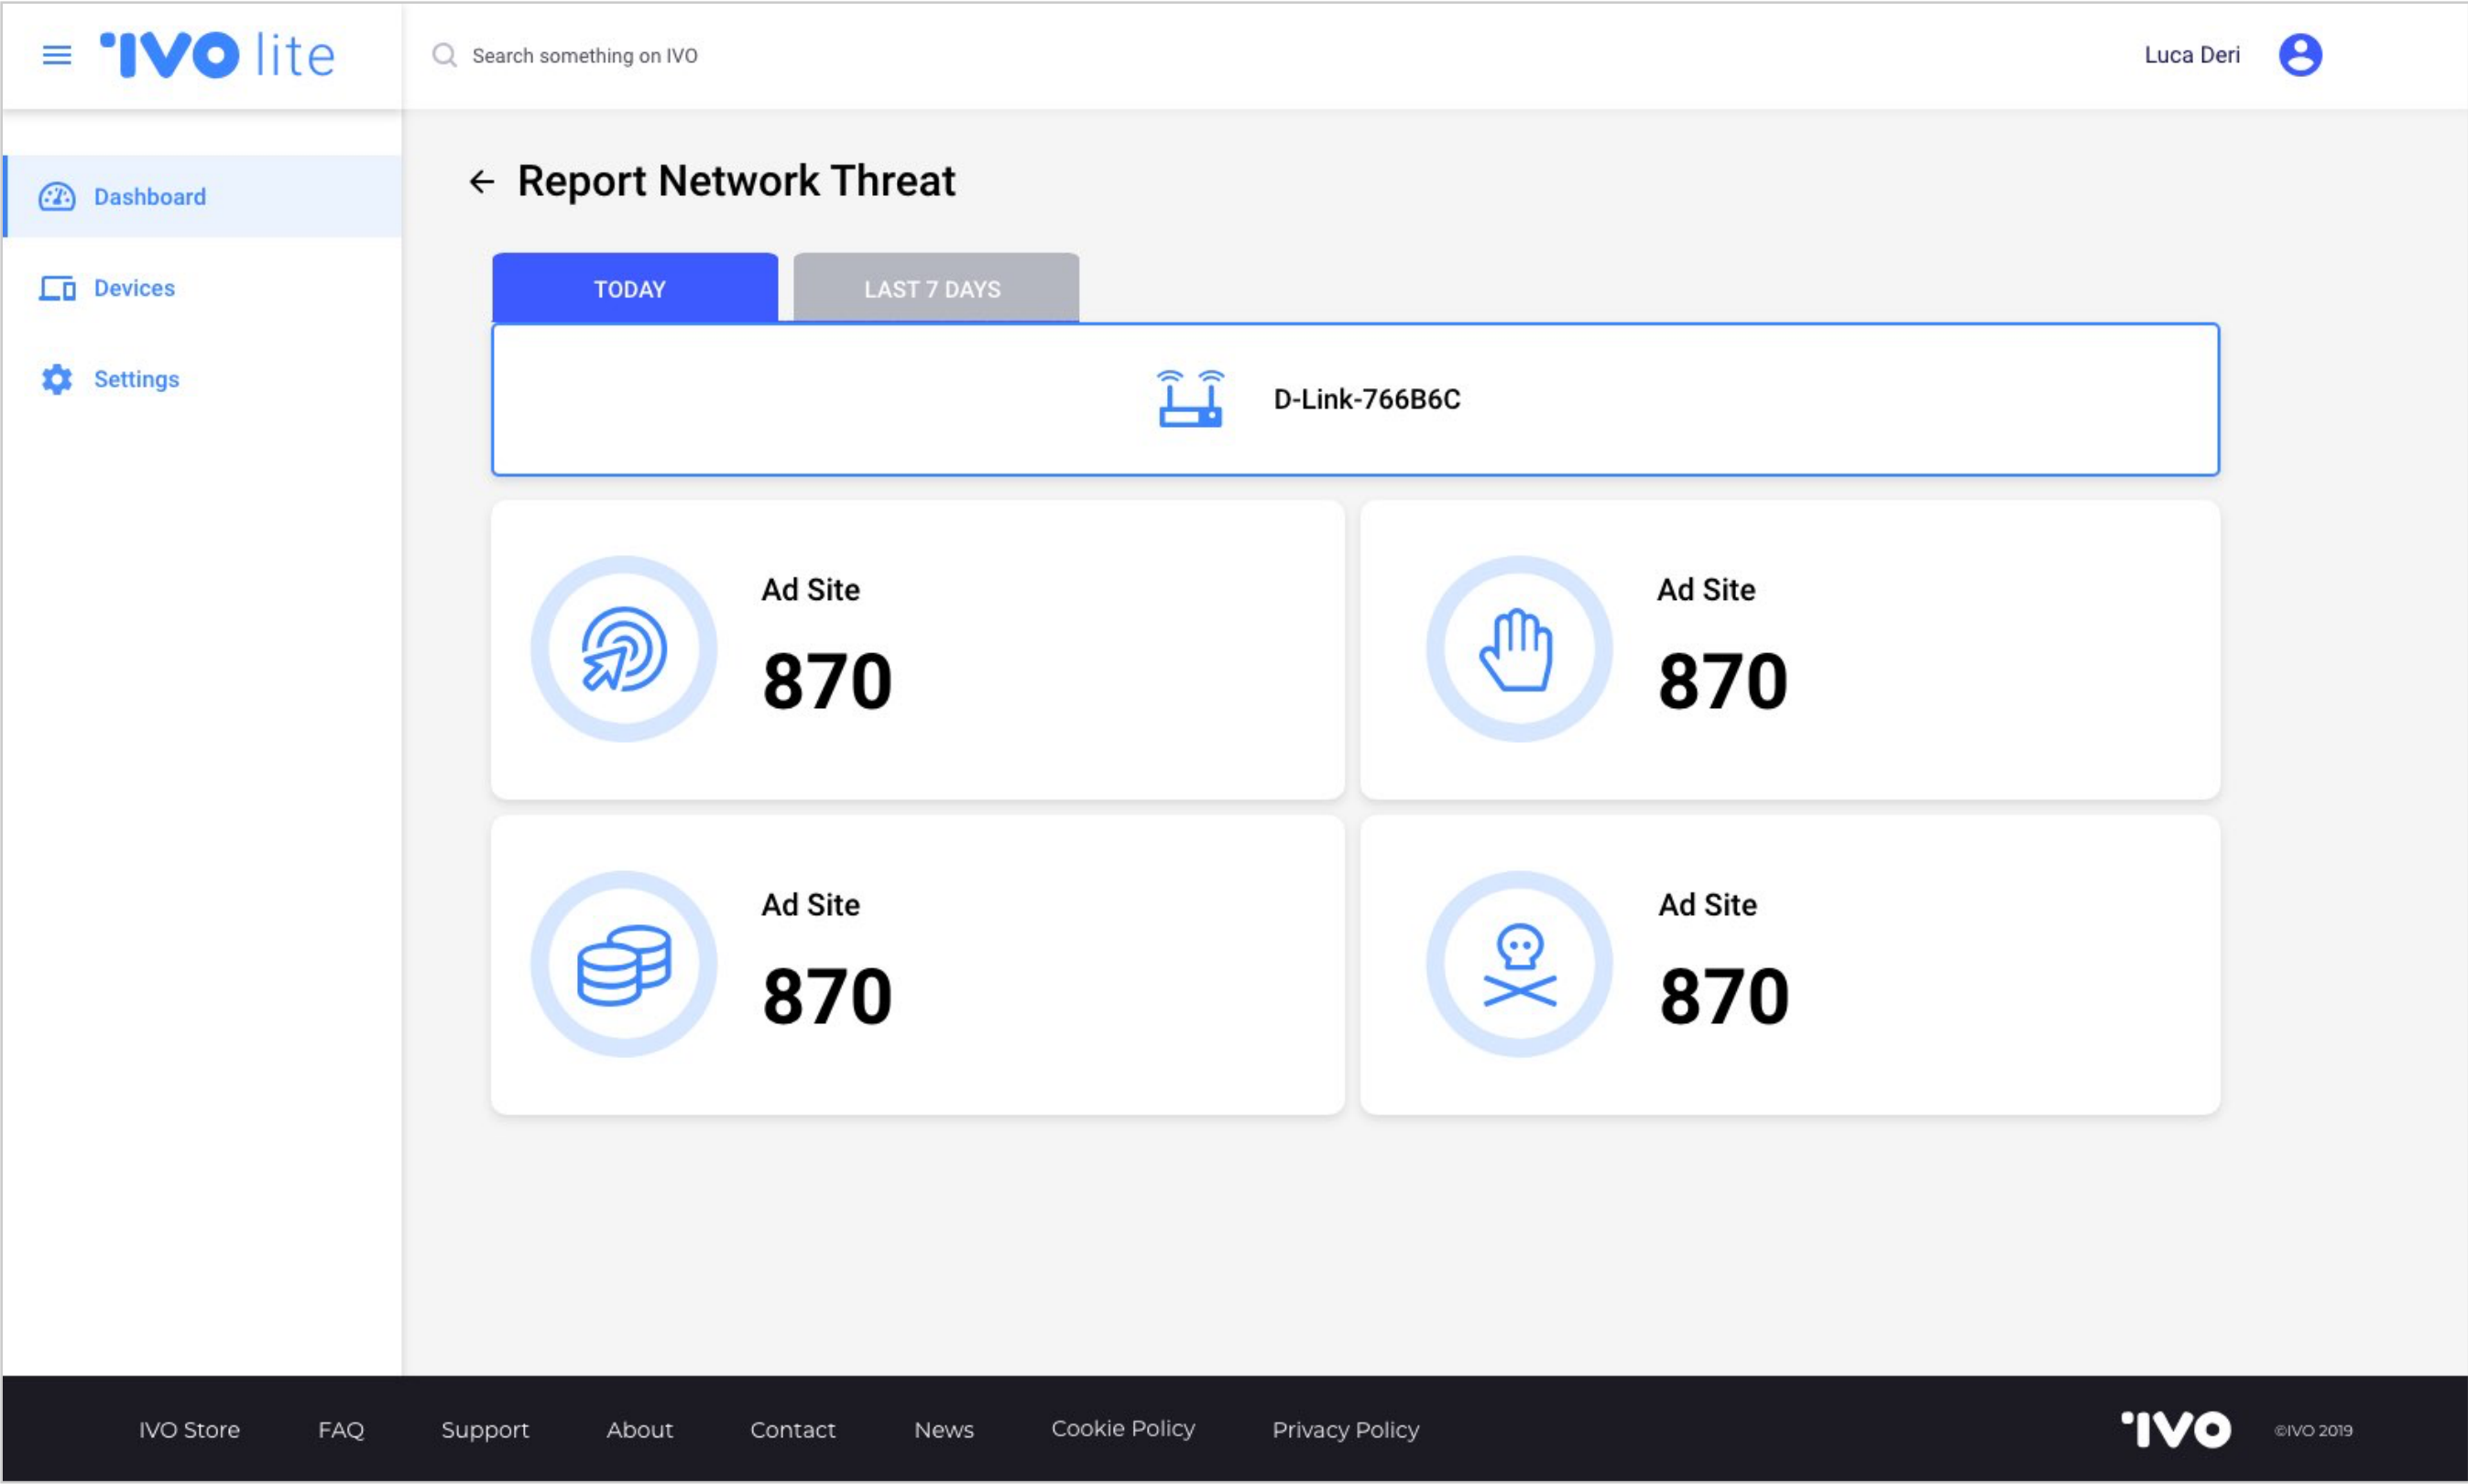

Produced

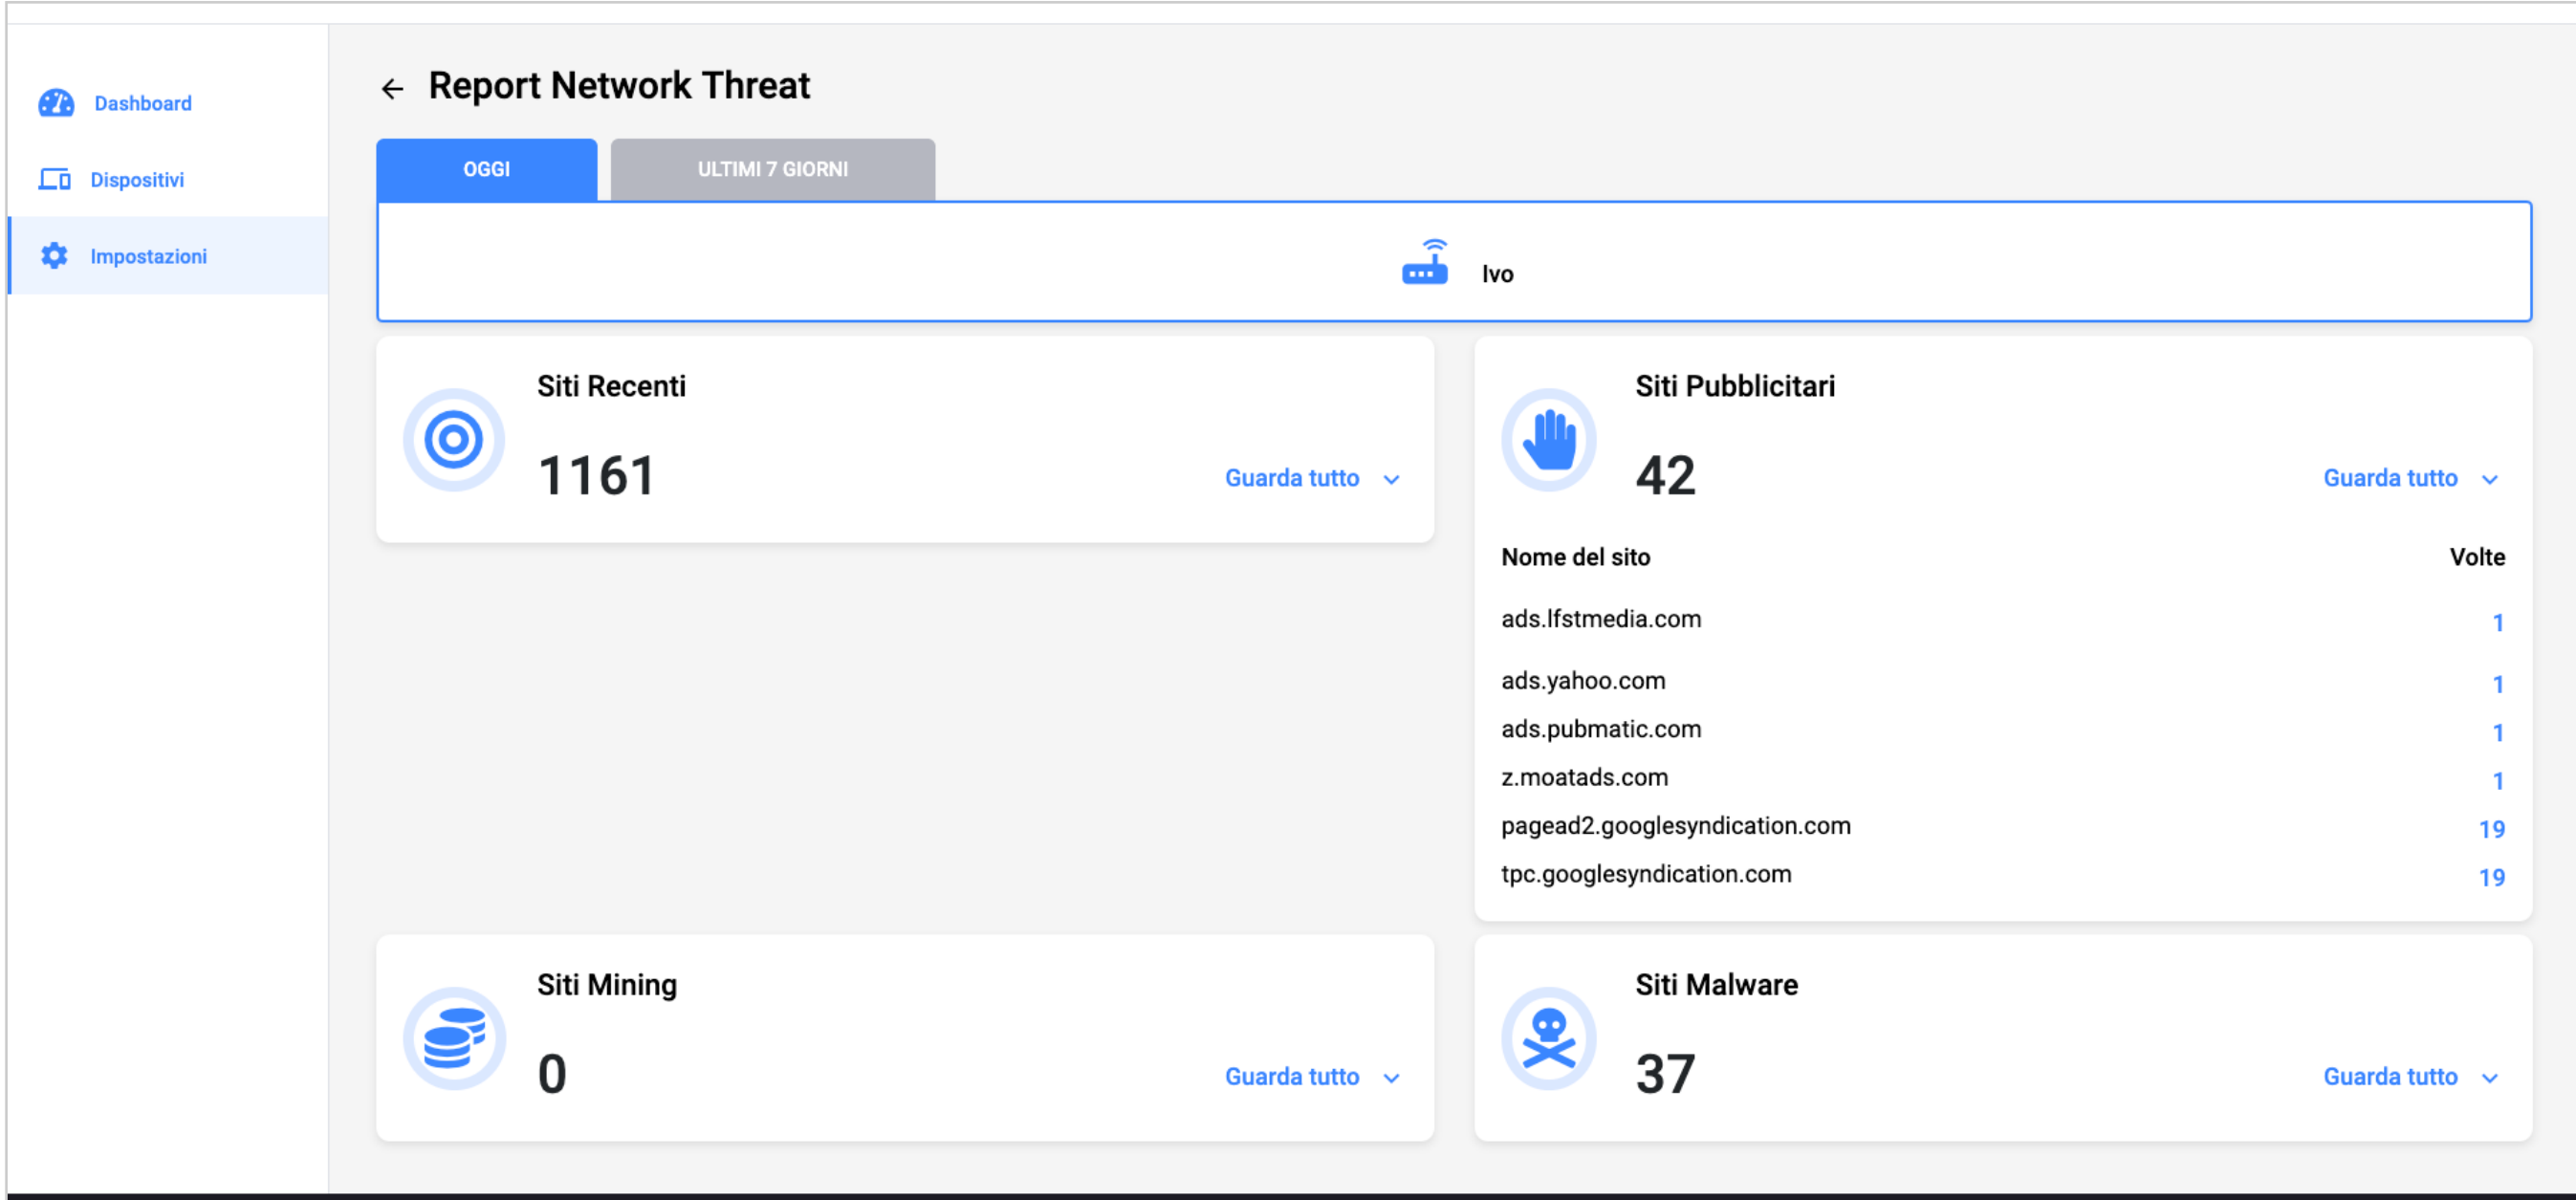

Corrections:

- Icons are wrong
- Numbers and text must be aligned with the circle containing the icon
- It is incorrect that the “Settings” menu item is switched on in the sidebar.

Original layout

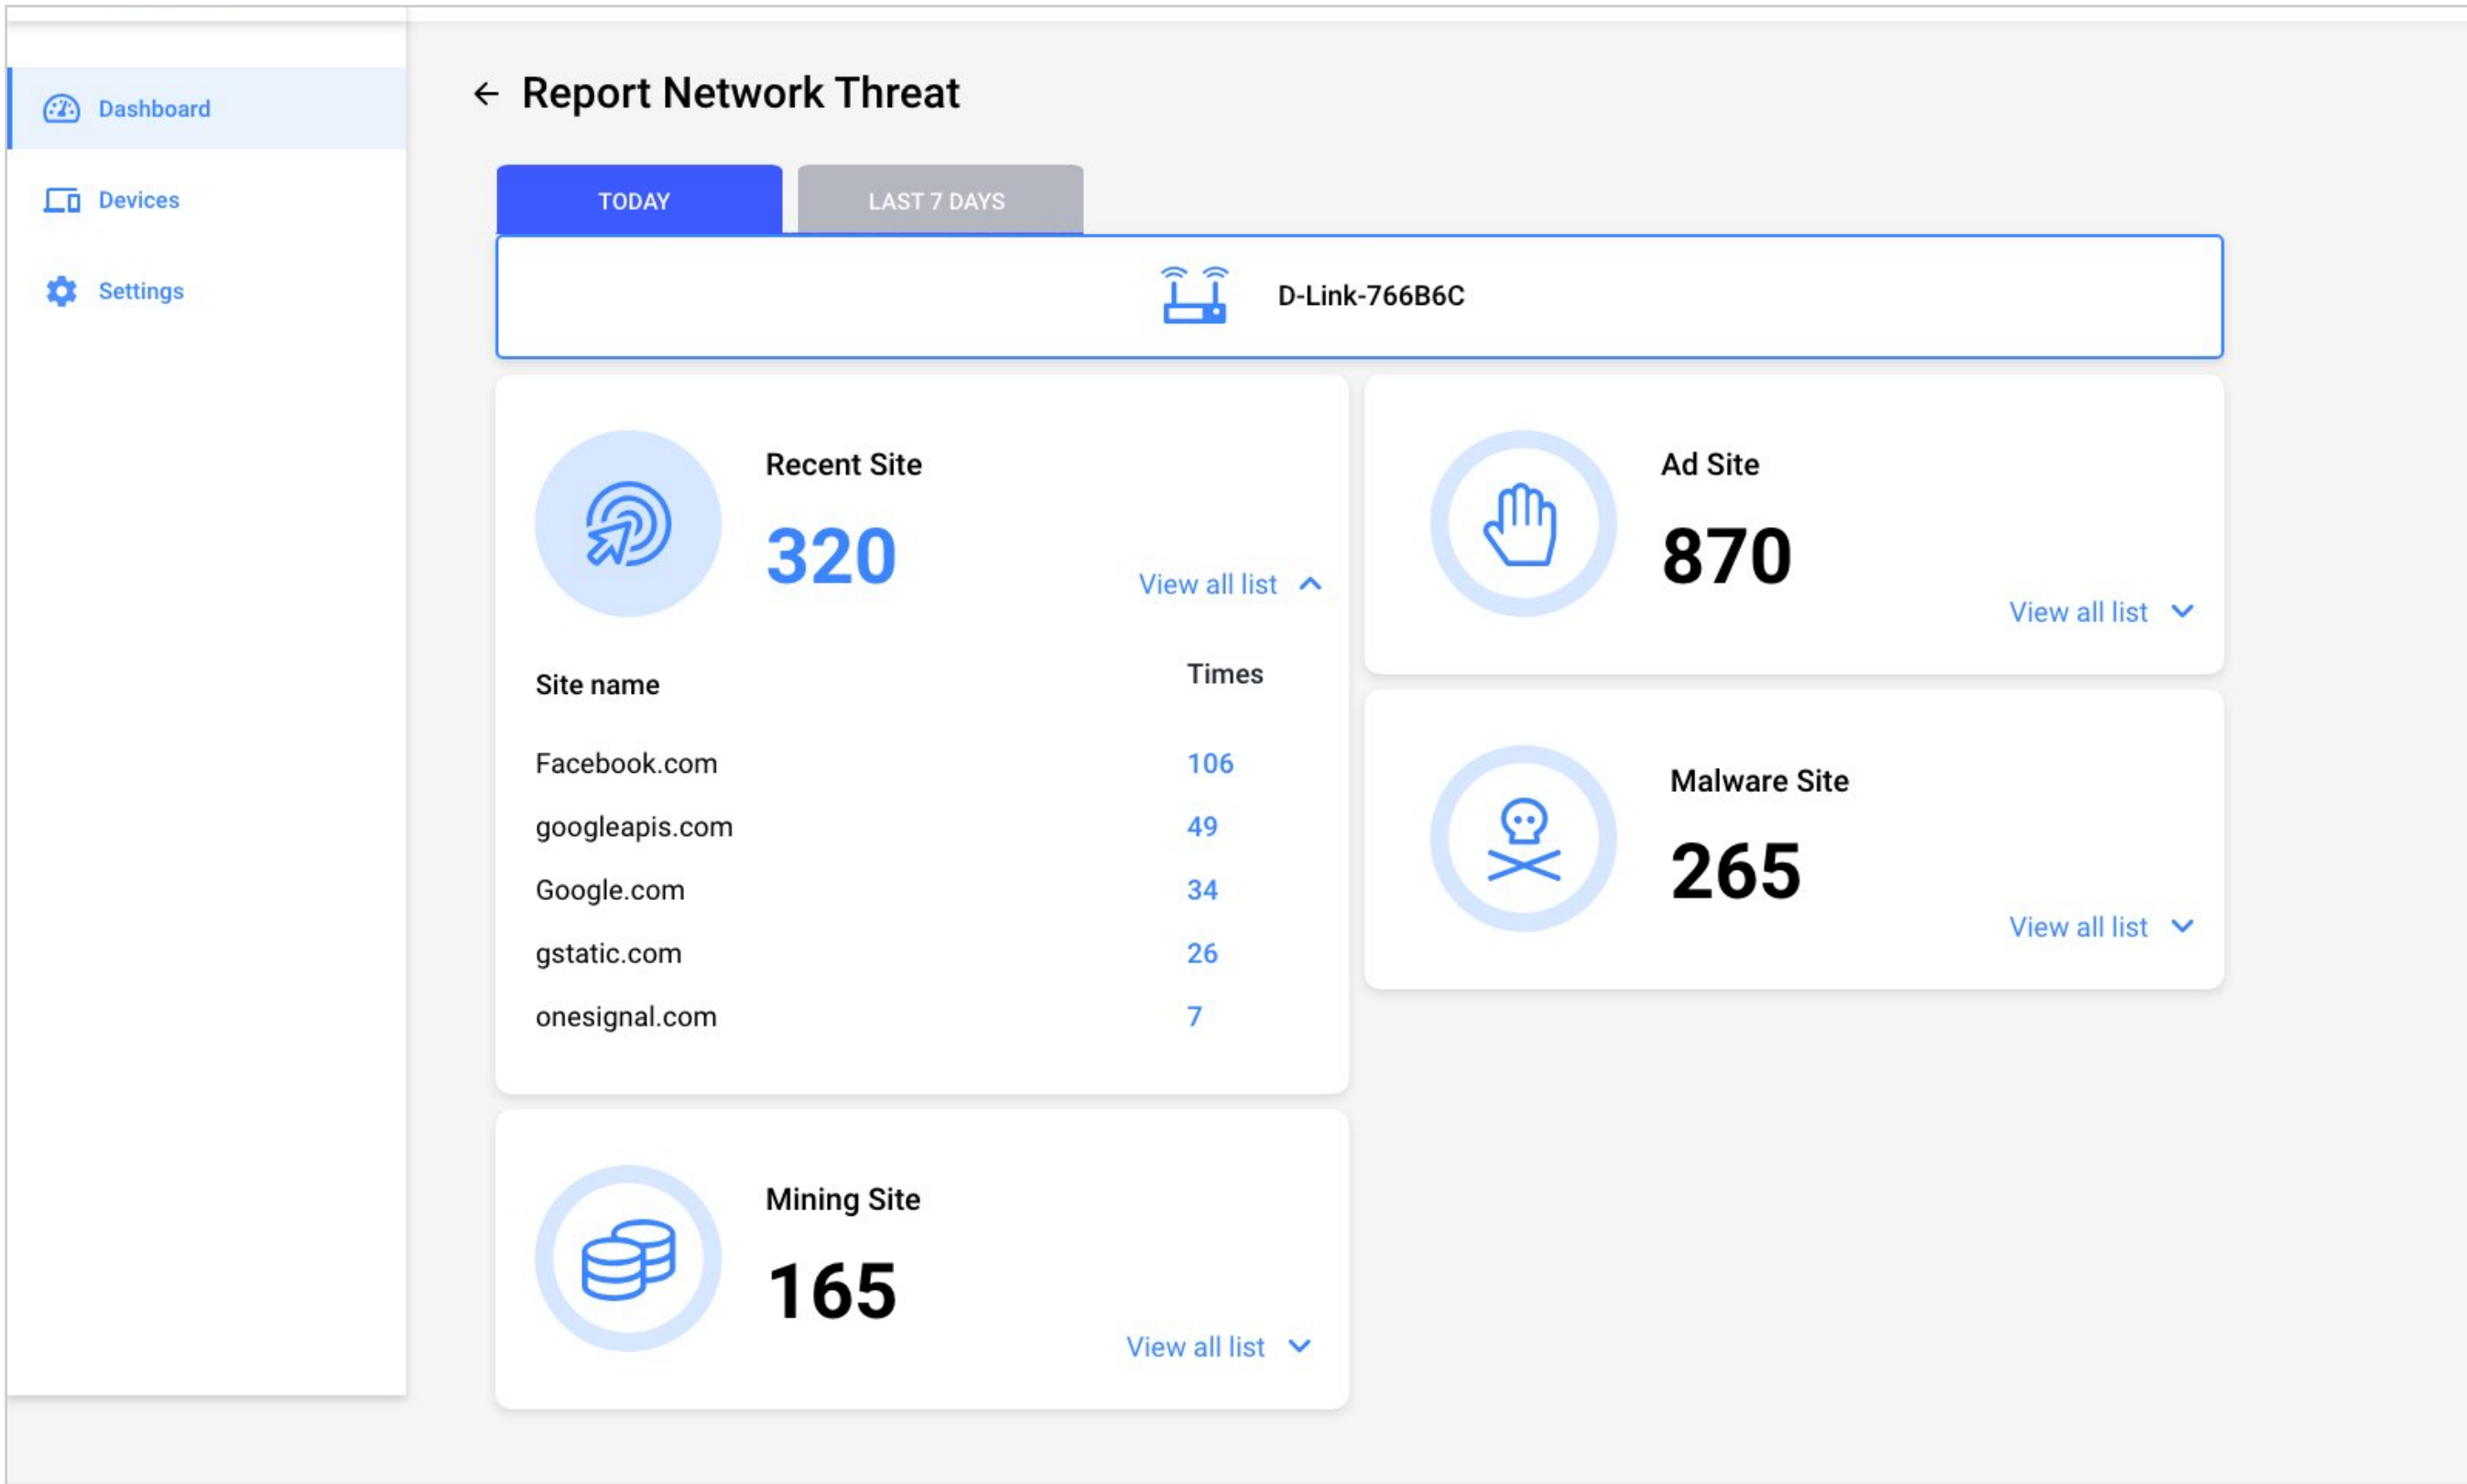

Produced

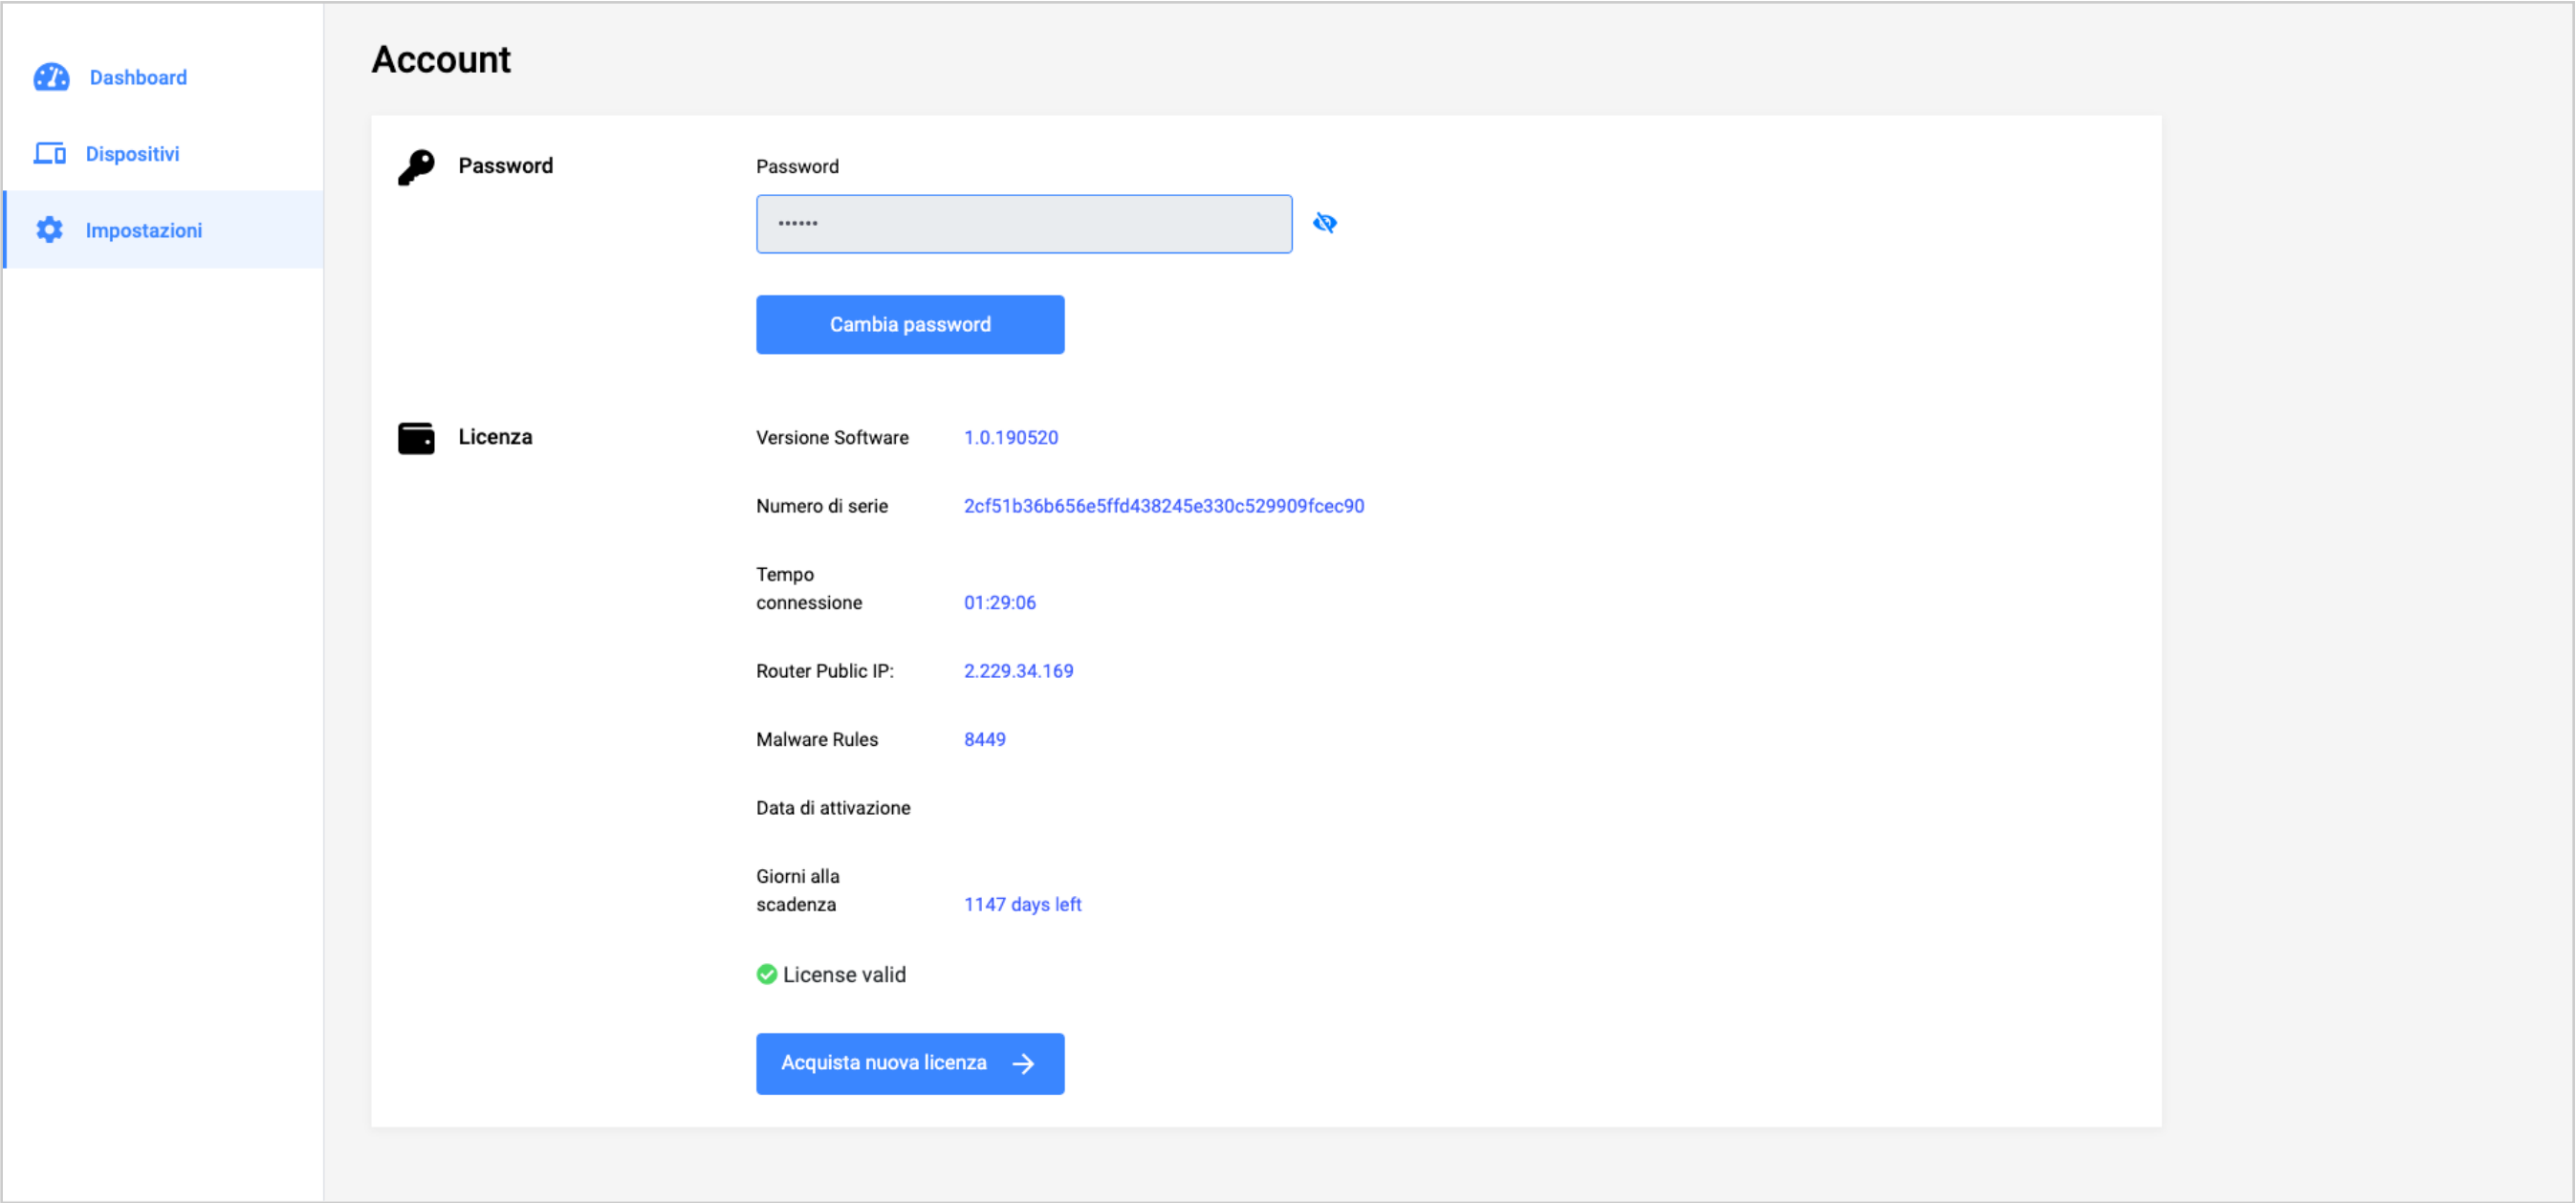

Corrections:

- This page I agree that it should be changed with the one designed for the IVO business dashboard, in case this is kept the corrections are the same as the report page.

Original layout

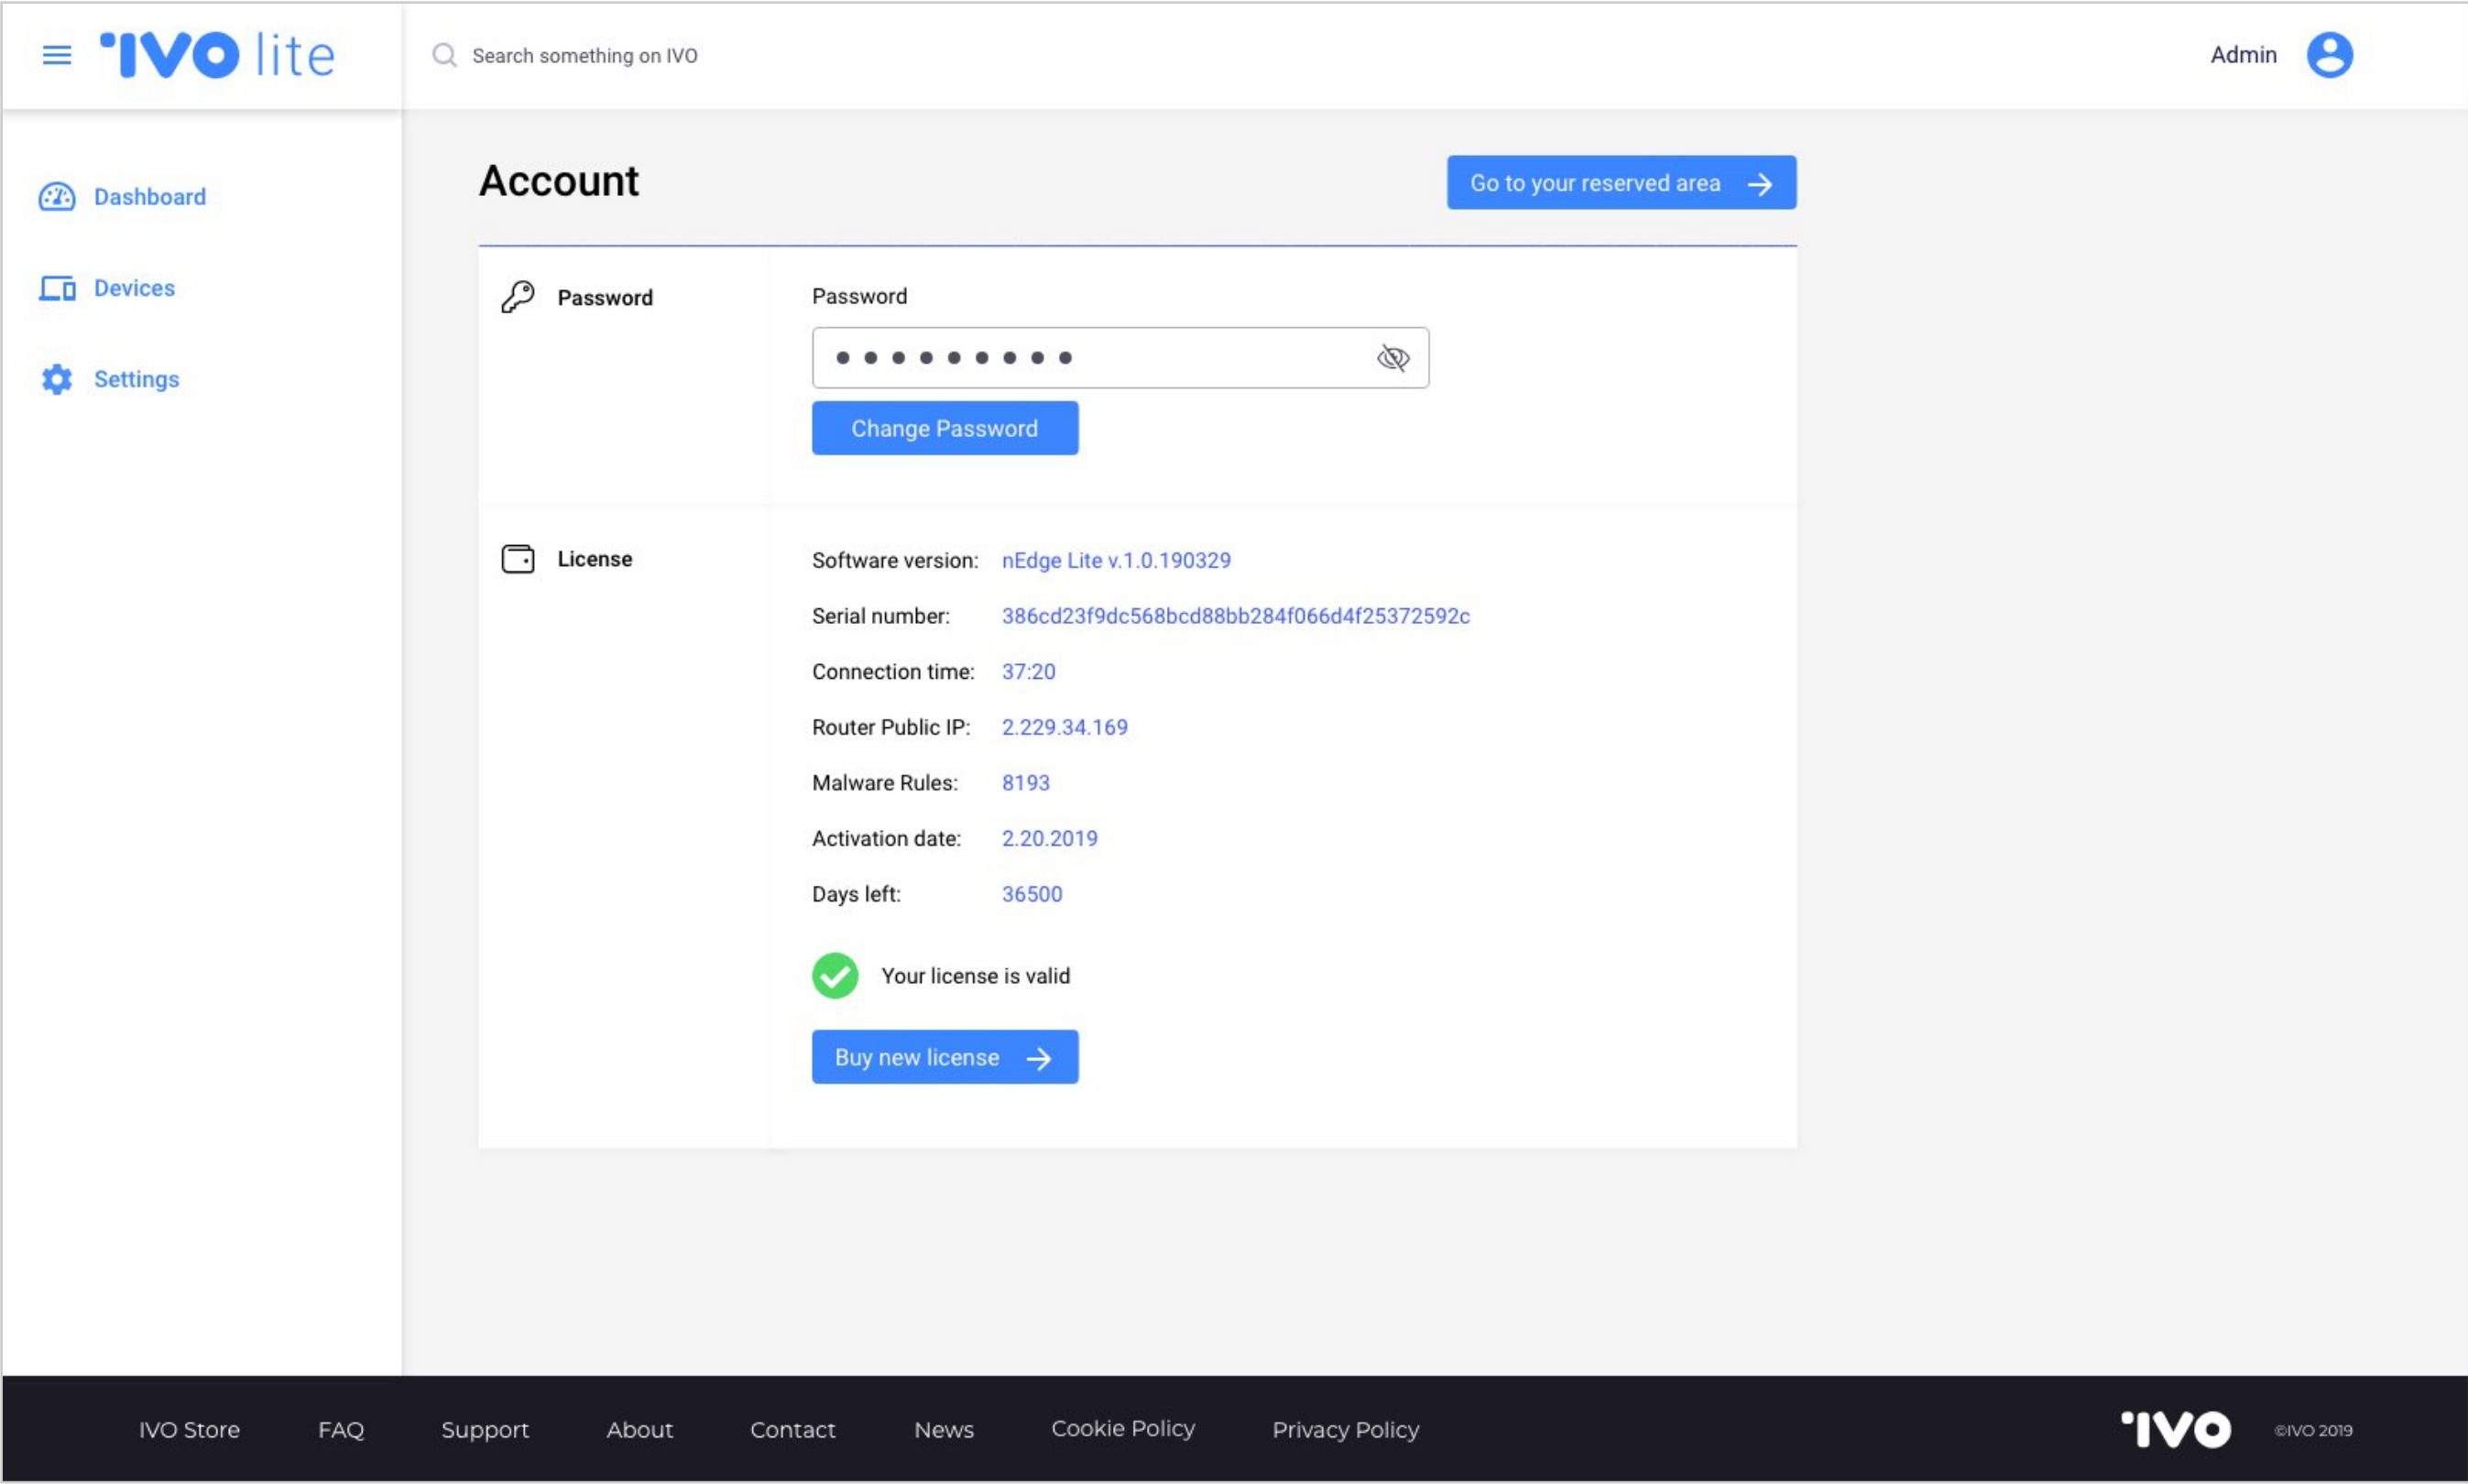

Produced

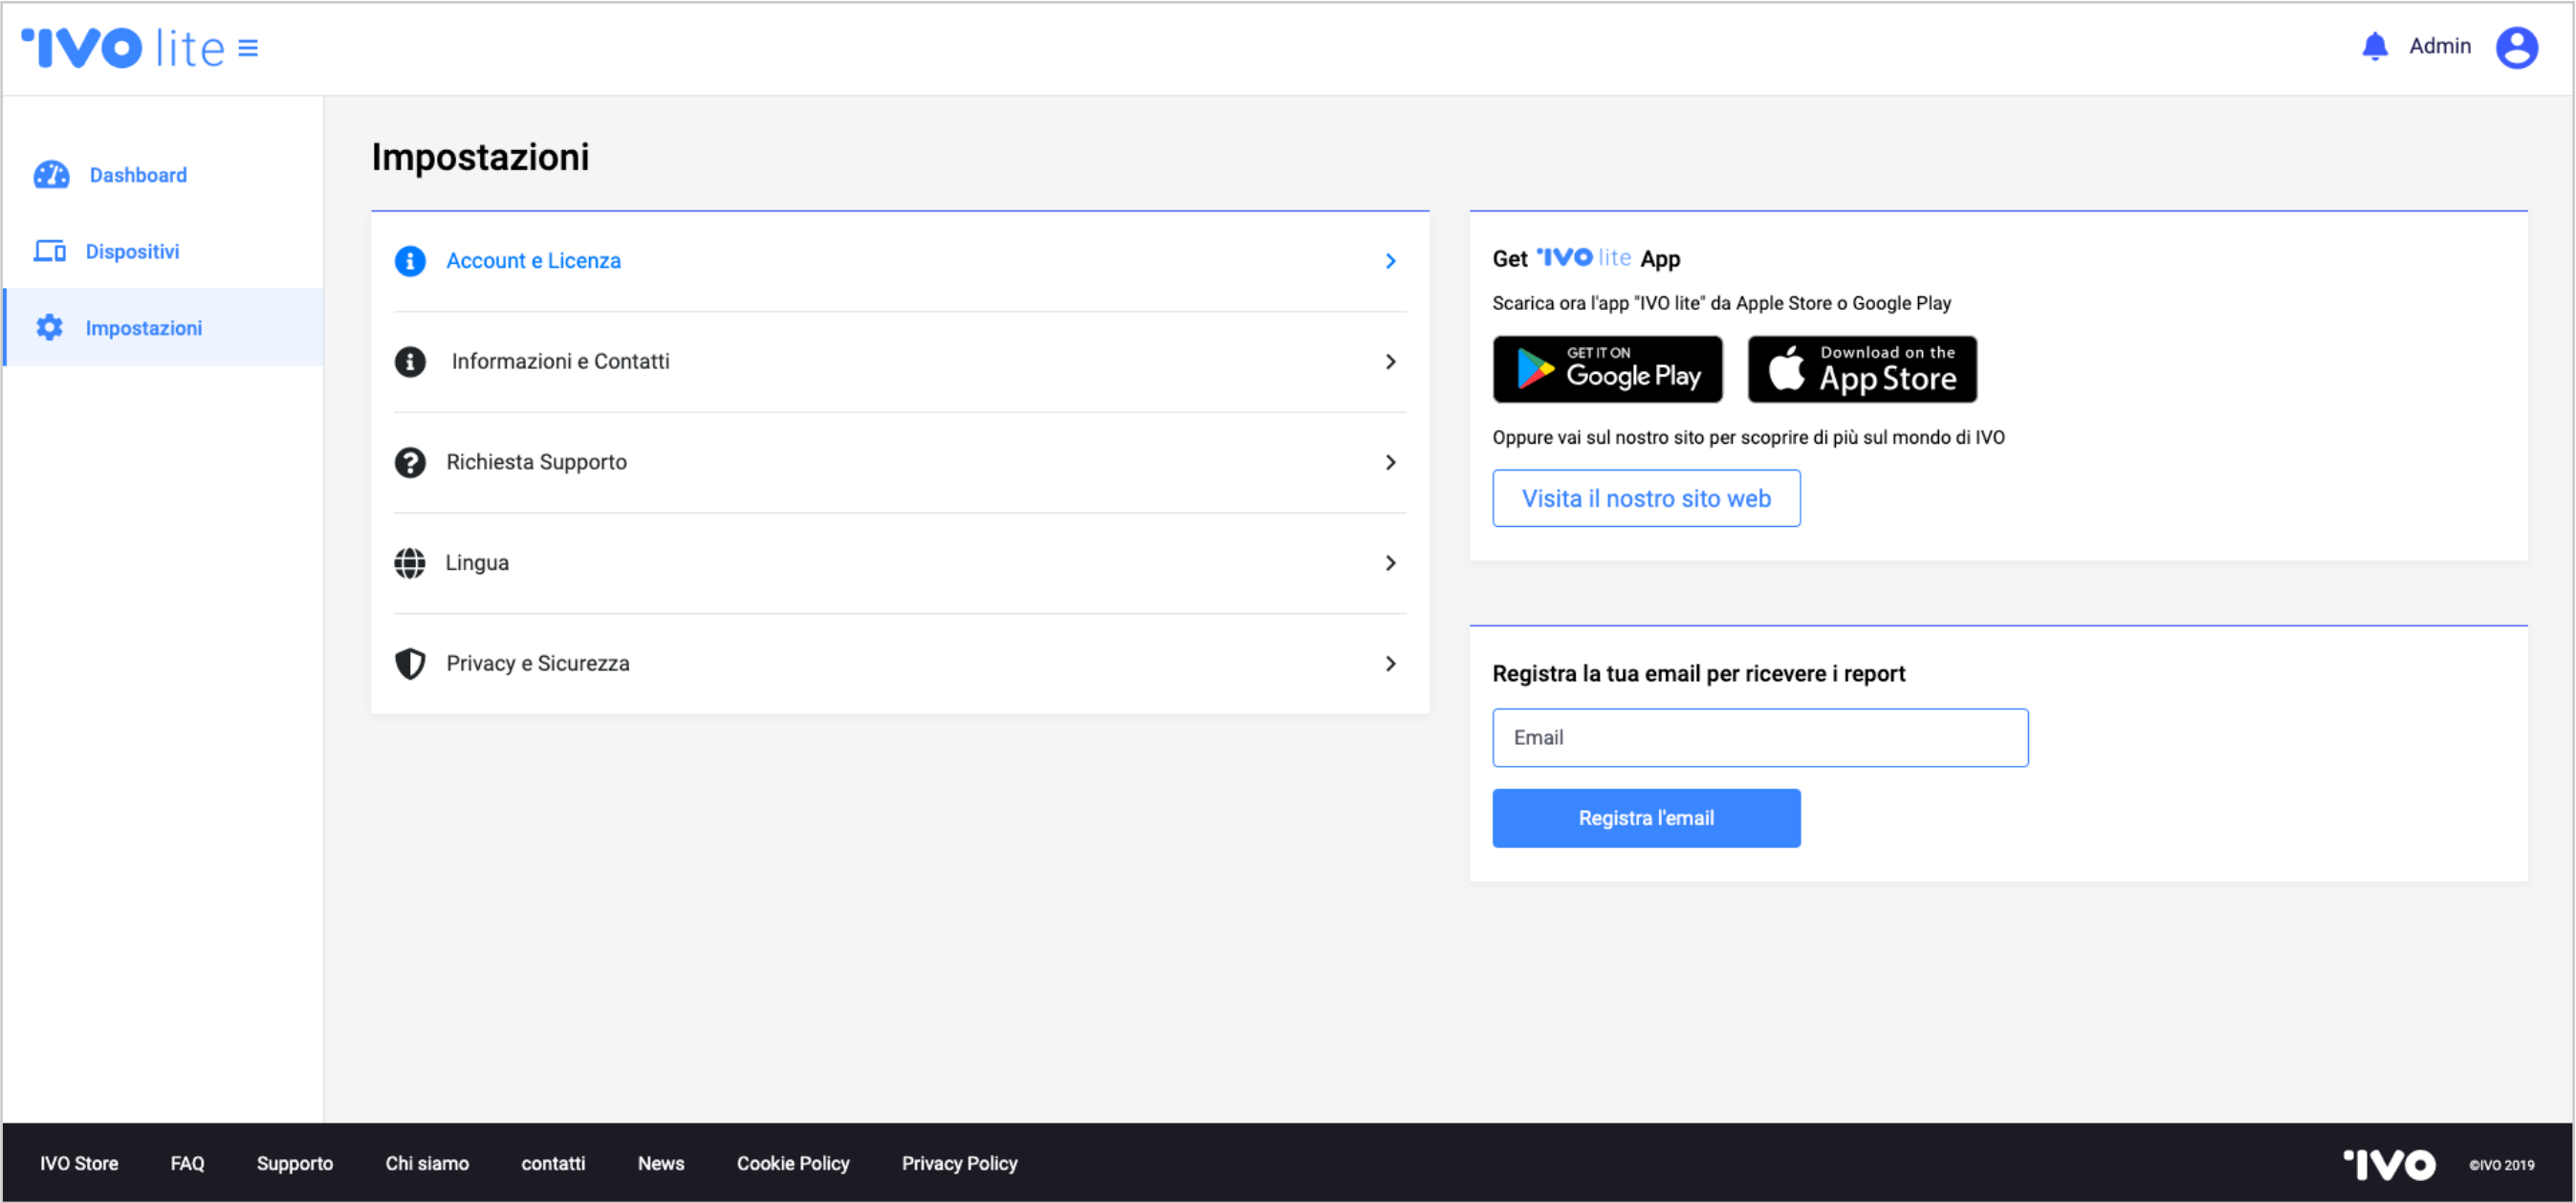

Corrections:

- Icons not full in case they are not found or we remove or change them
- Password OK! The only thing is that the show password eye should go inside the cell
- License: all on one line as there is a lot of space

Original layout

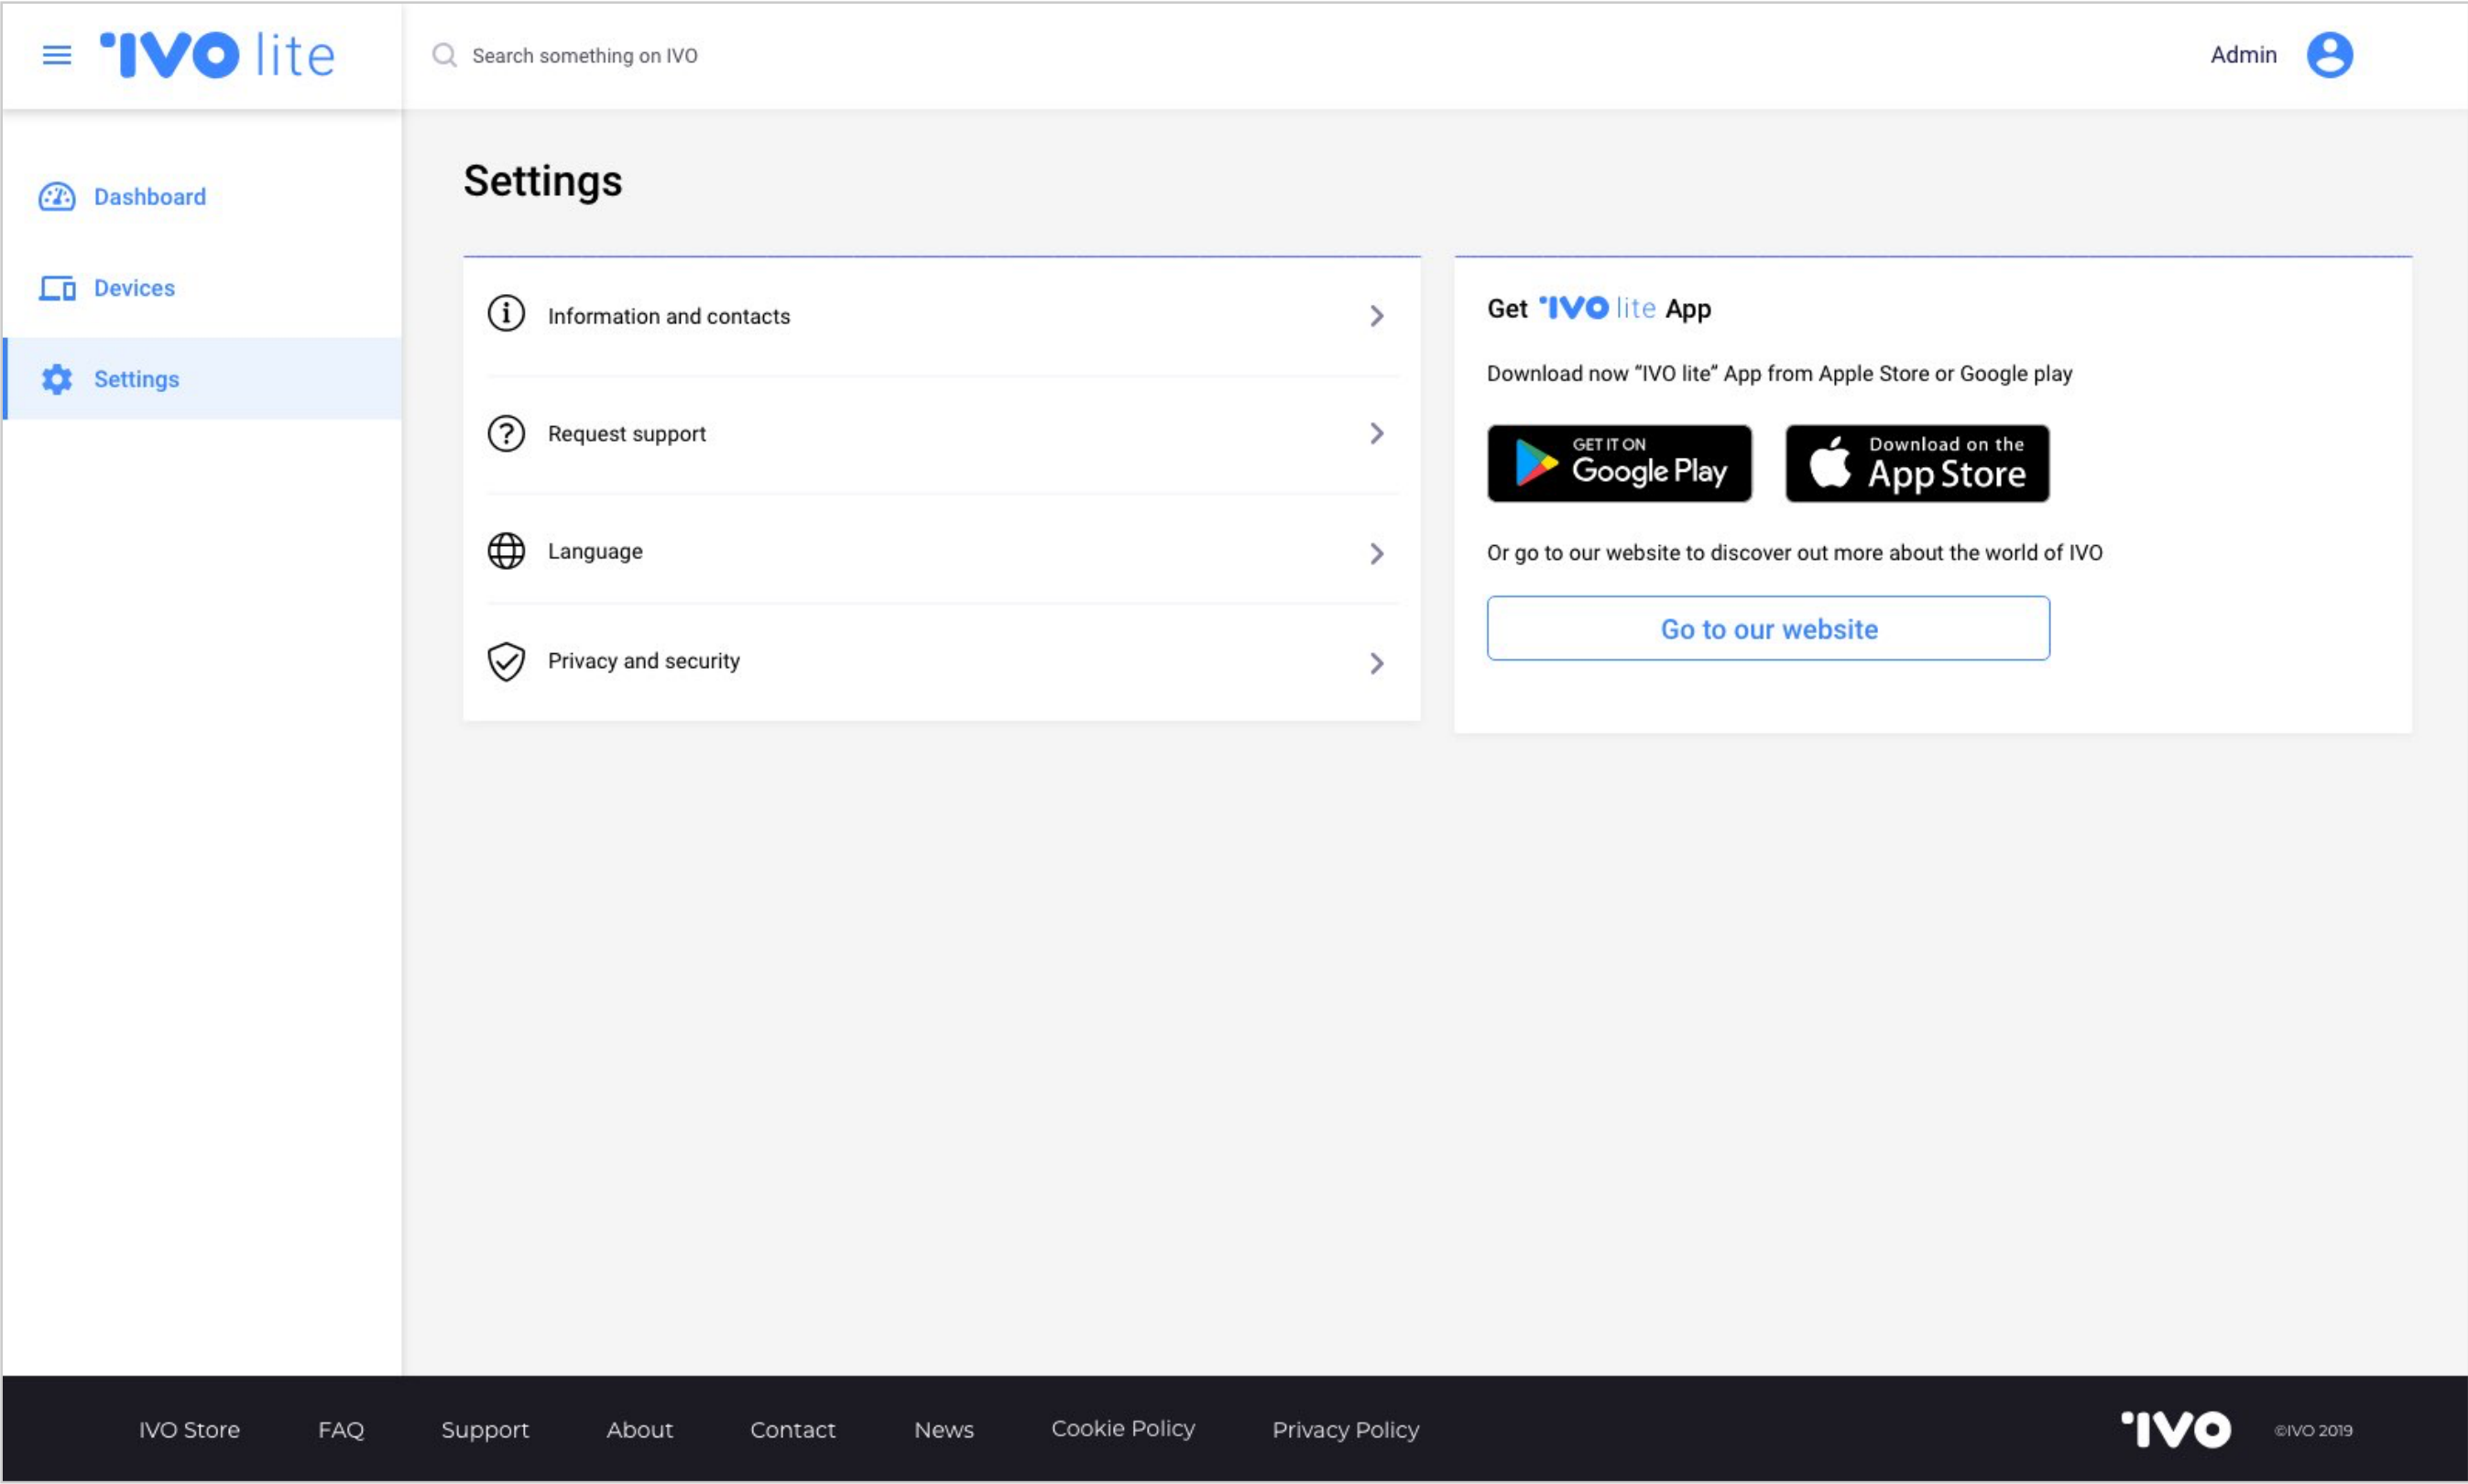

Produced

Corrections:

- The icons must be arranged as in the rest of the pages, we find a solution because they must be made homogeneous on each page. At this point we use material icons for everything rather than having the icons a little full and a little empty.
- The report box has to be studied better because it doesn't work like this
- Also this page should be done as in the new design of IVO business to have more control in future changes.

Original layout

Produced

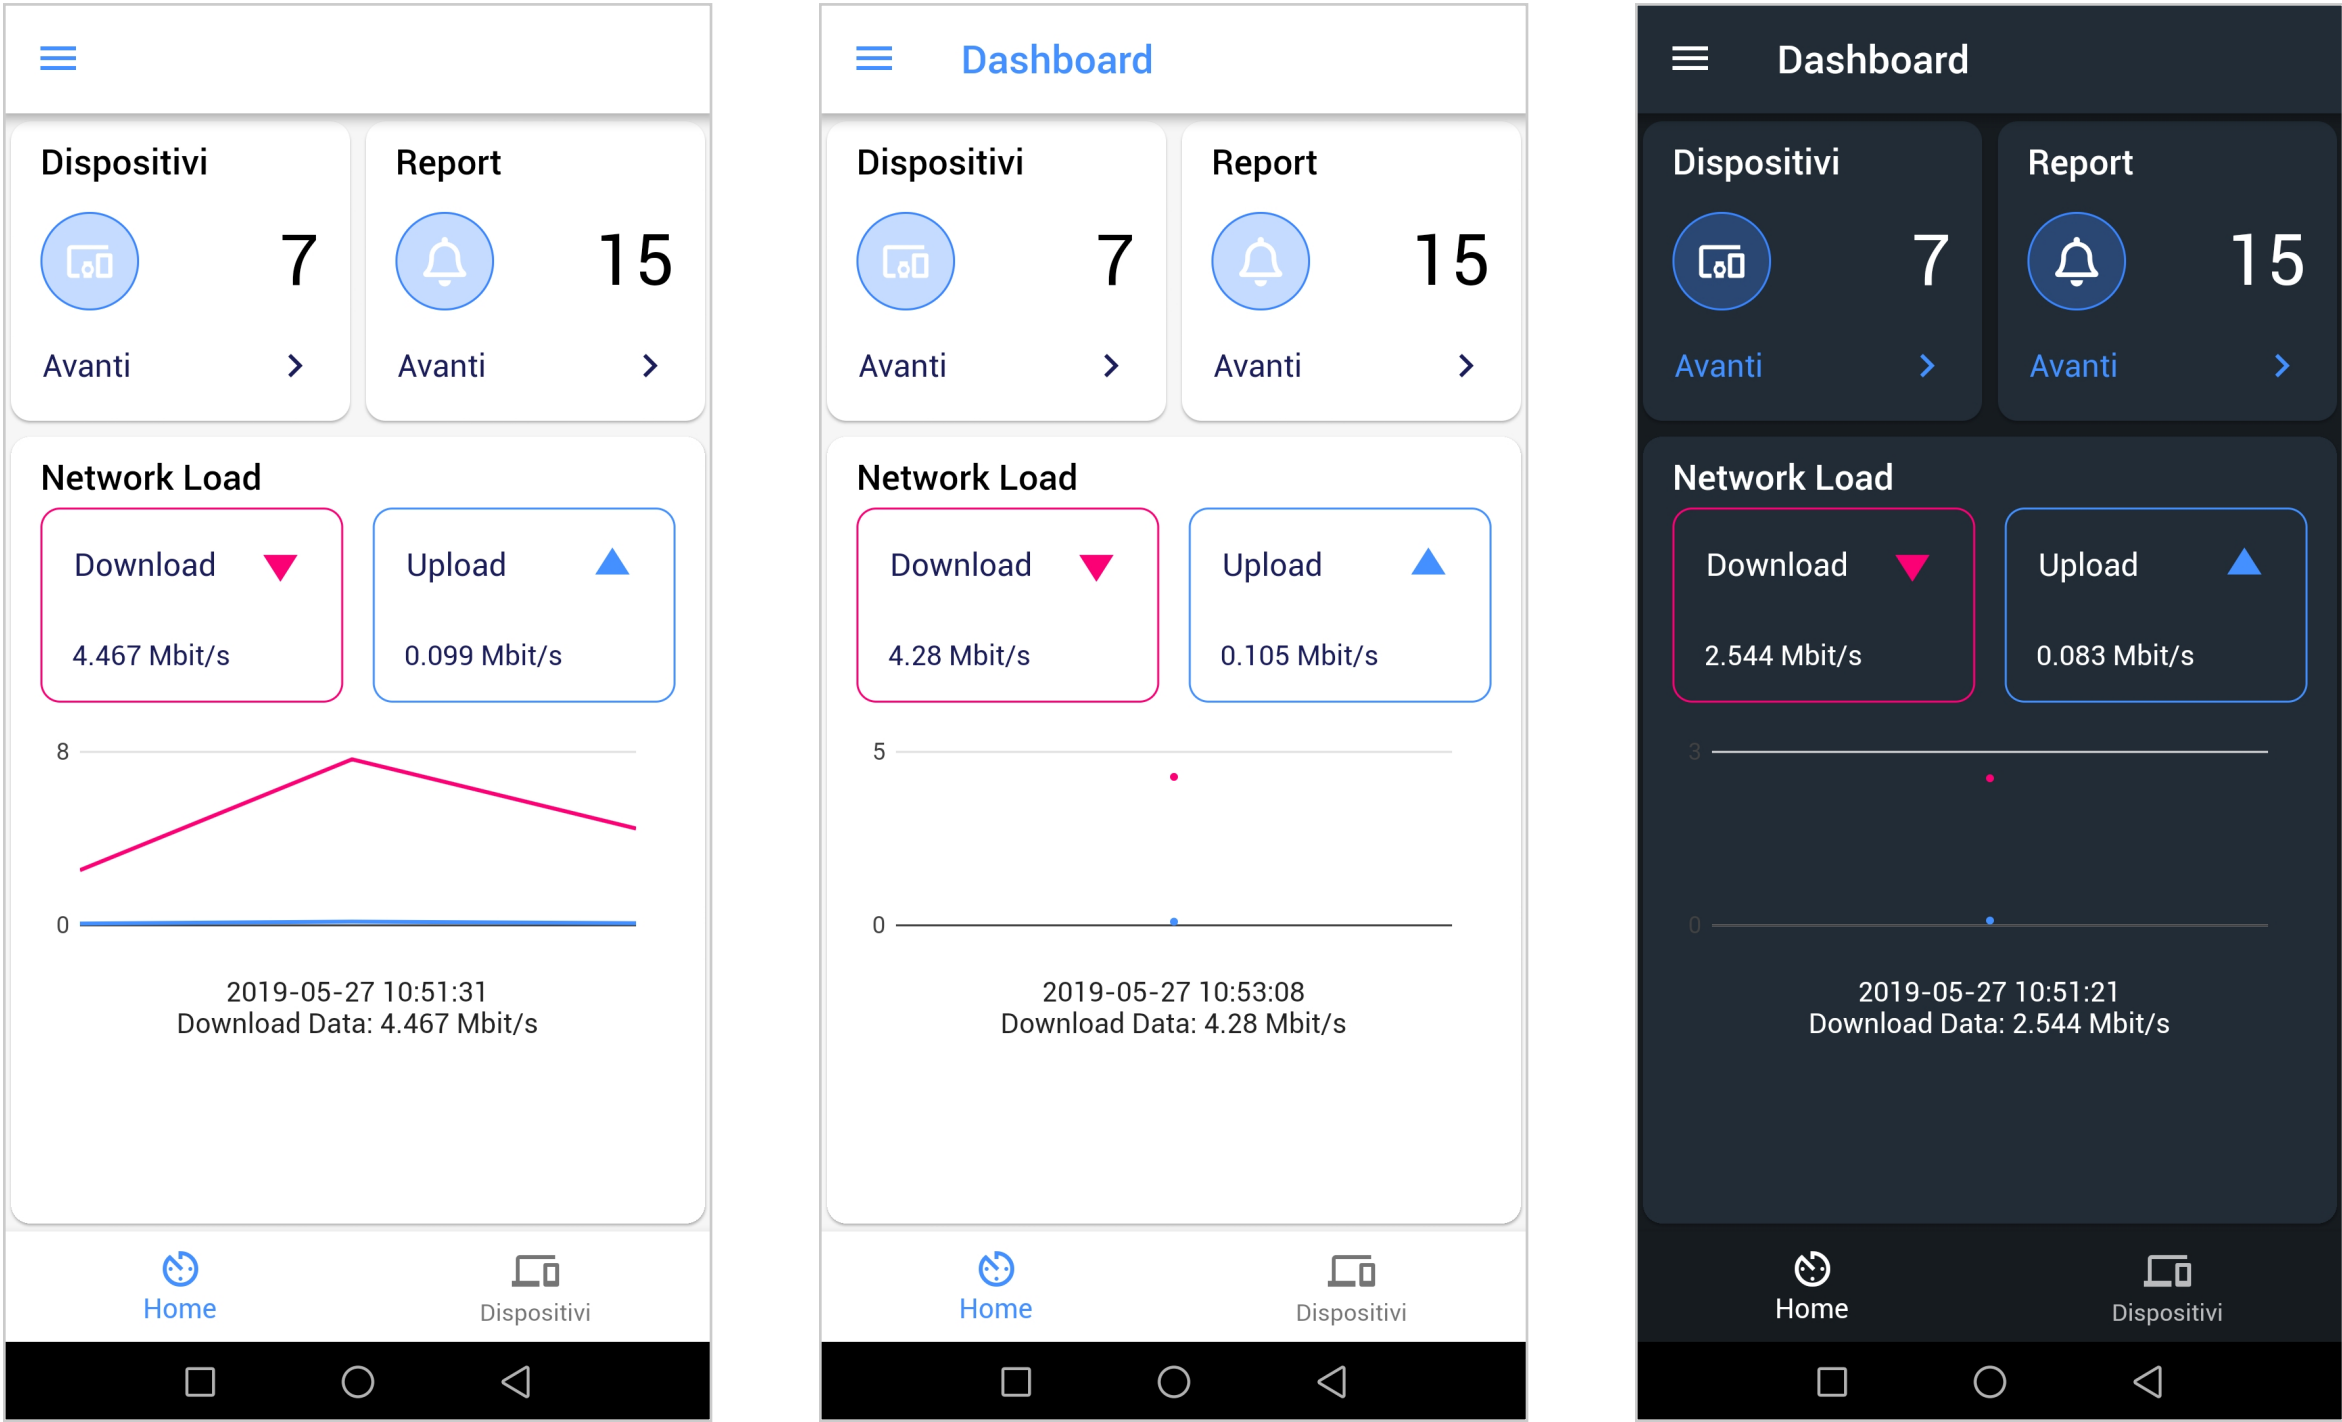

Corrections:

- The logo in the toolbar should be centered
- The loading would go bigger
- The biggest button

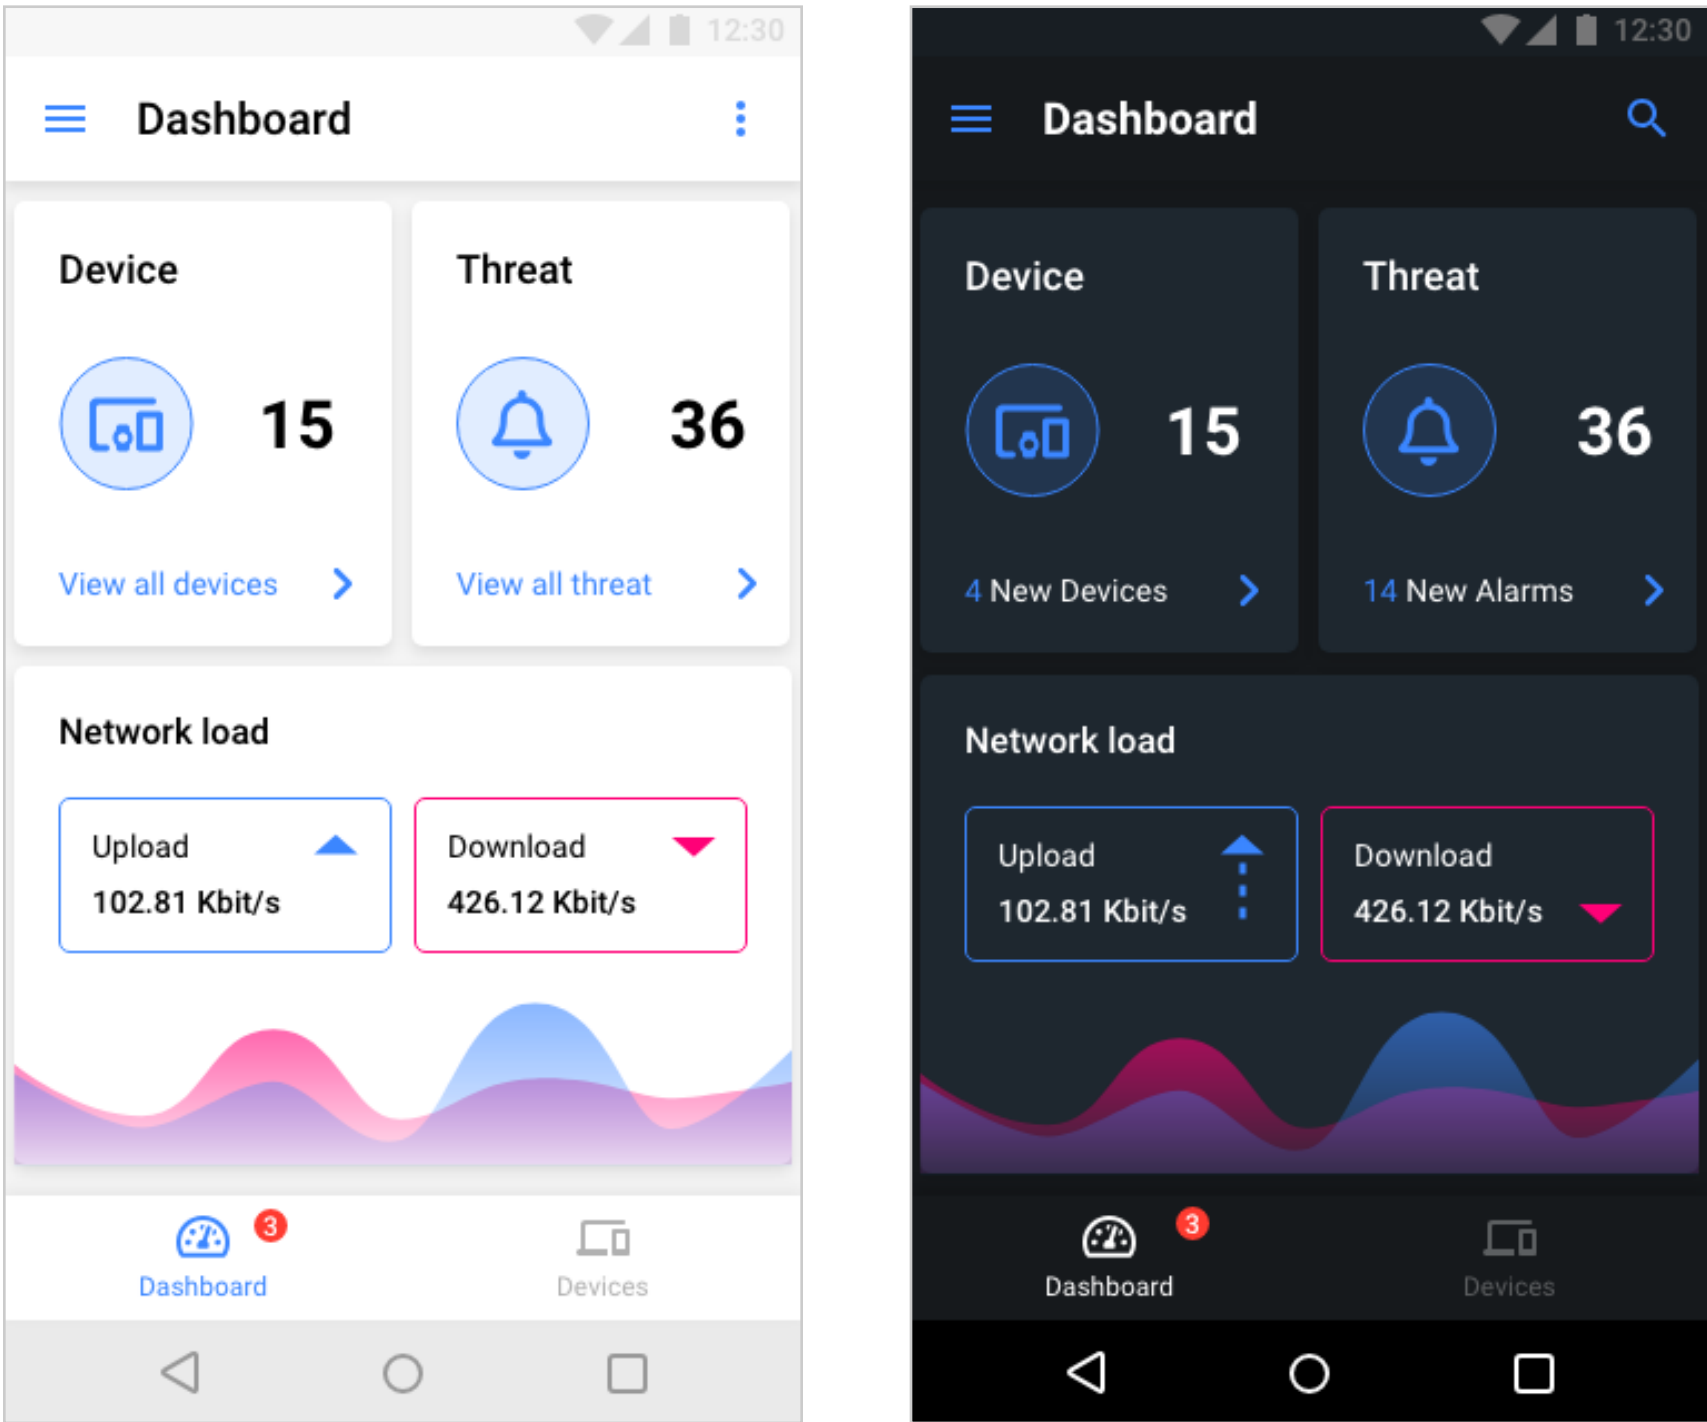

Original layout

Produced

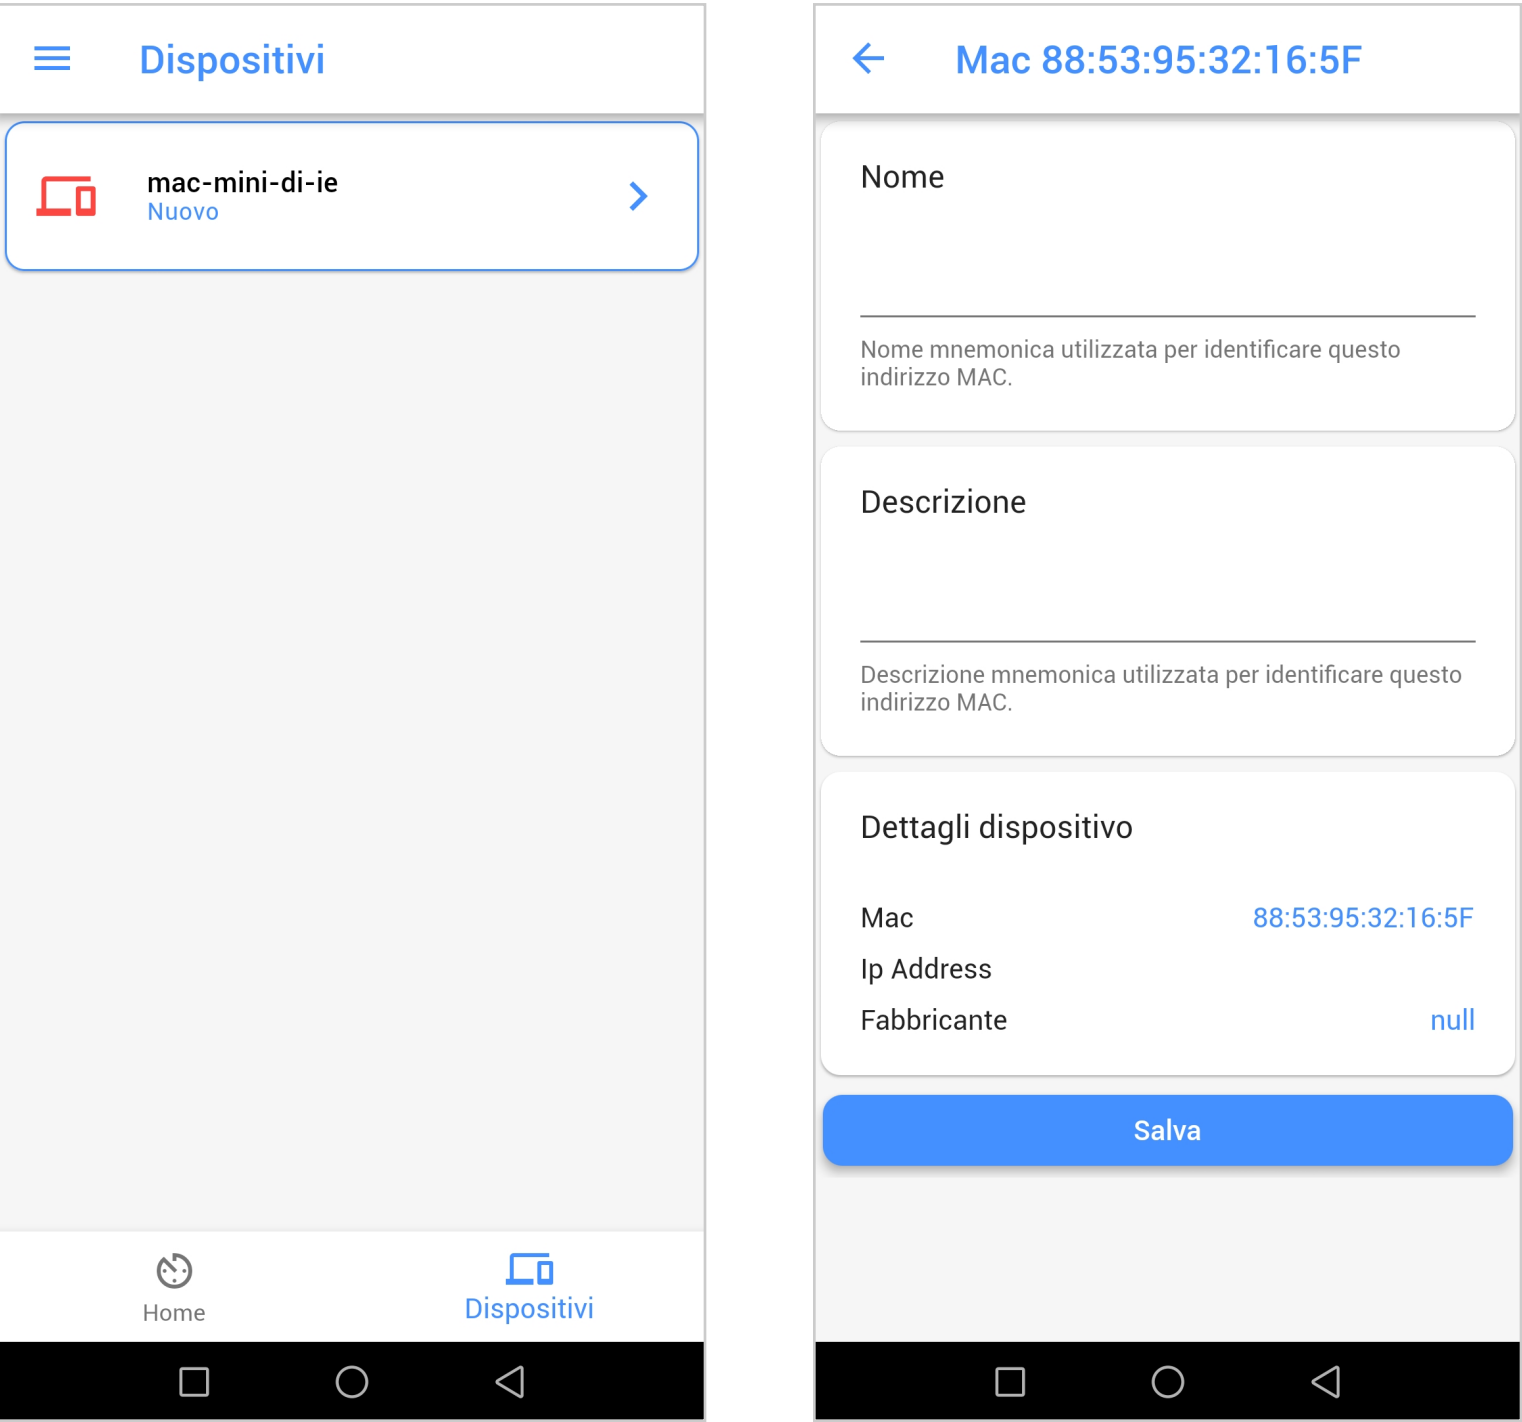

Original layout

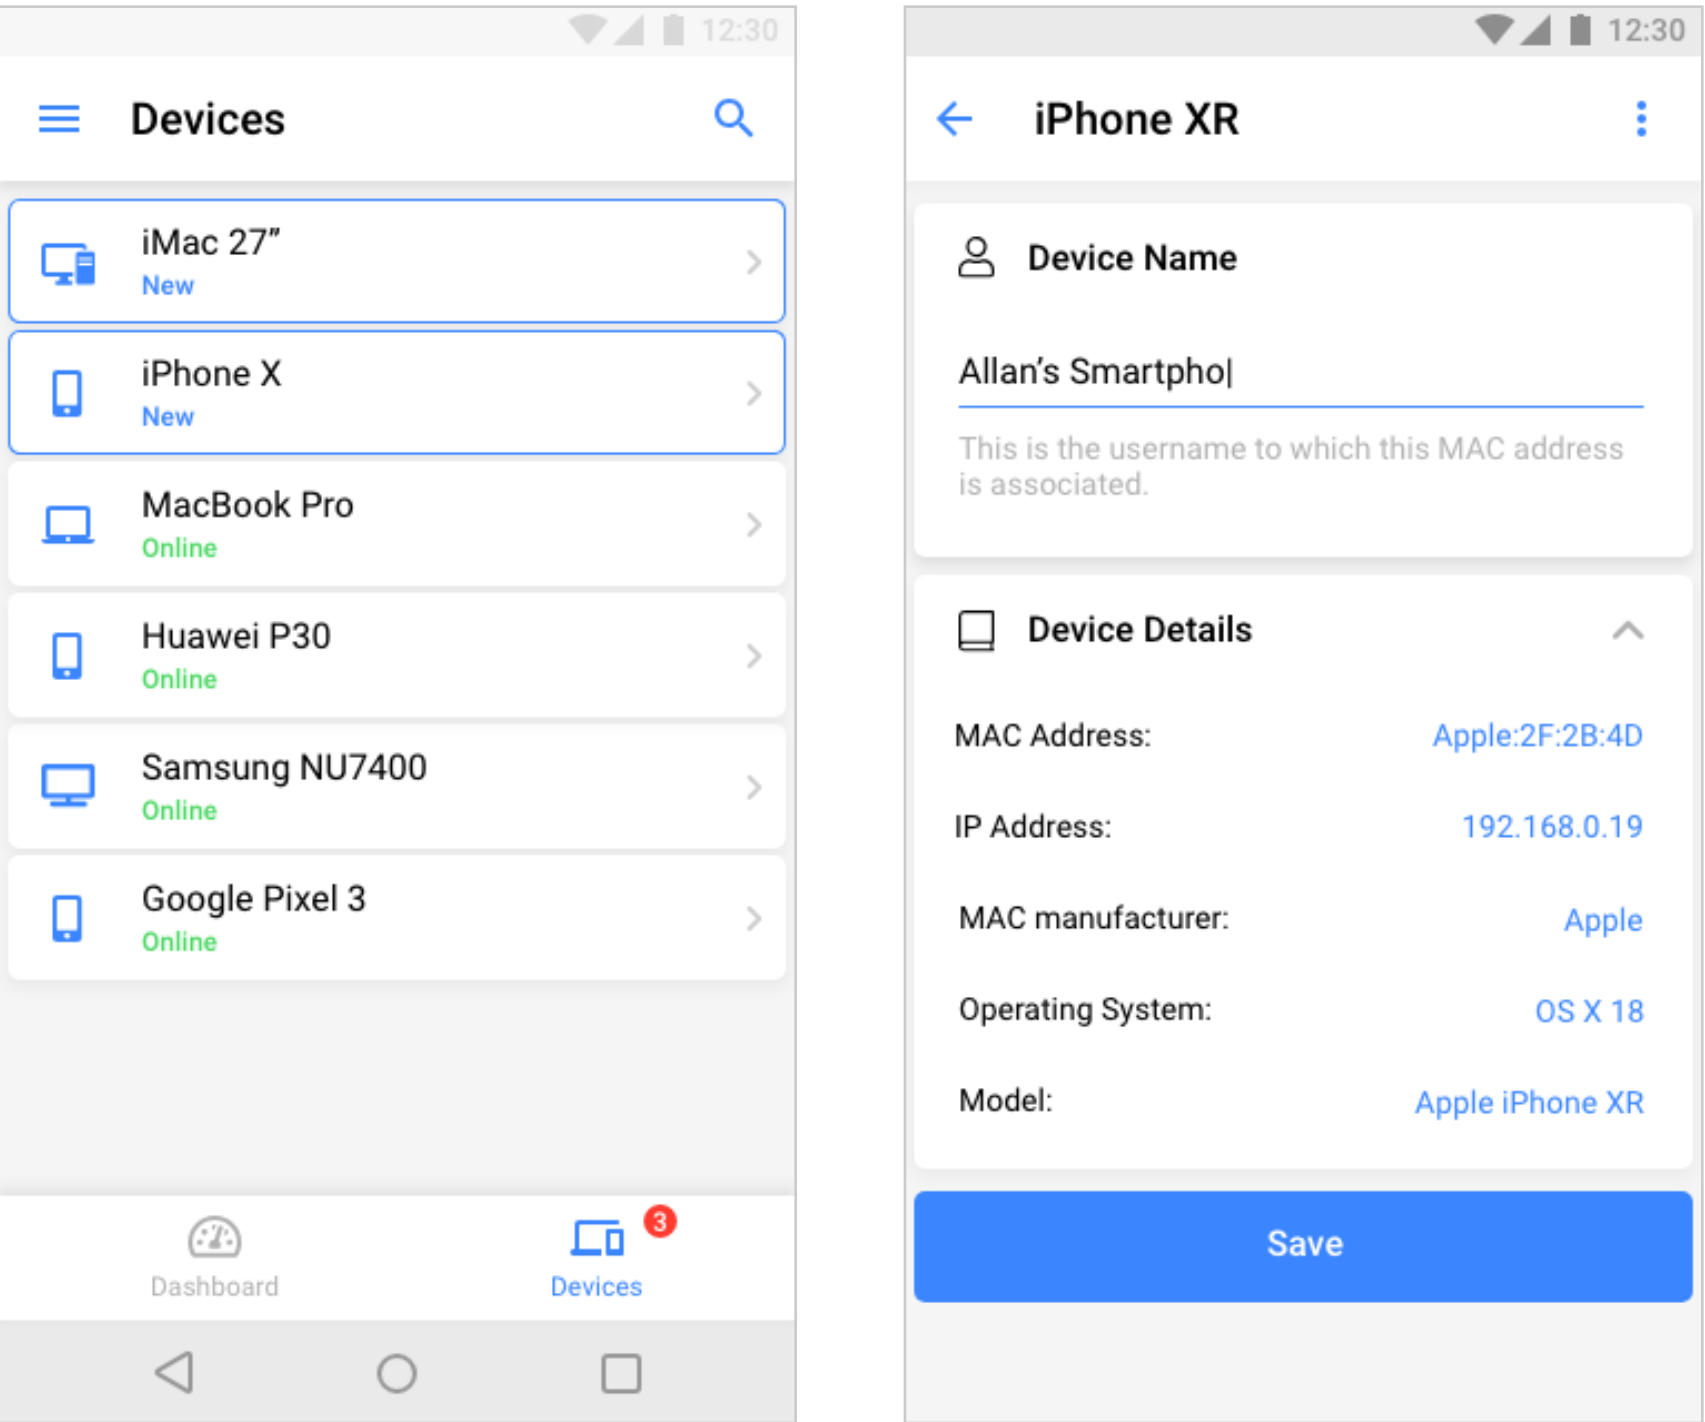

Corrections:

- In the toolbar must be put the title of the page
- Writings in the toolbar go black/white
- The icons in the toolbar are blue Hex: #3B86FF
- The icon in the bottom navbar for the dashboard is wrong
- The icons are blue Hex: #3B86FF
- The bottom navbar and the toolbar are to be of the same color
- Special attention to the spaces
- Too much shadow on the toolbar
- Too much border radius in the boxes
- The icons I drew on the right in the toolbar are useless.
In case you need a bell for notifications we add it in this page instead of the lens.

Produced

Original layout

Corrections:

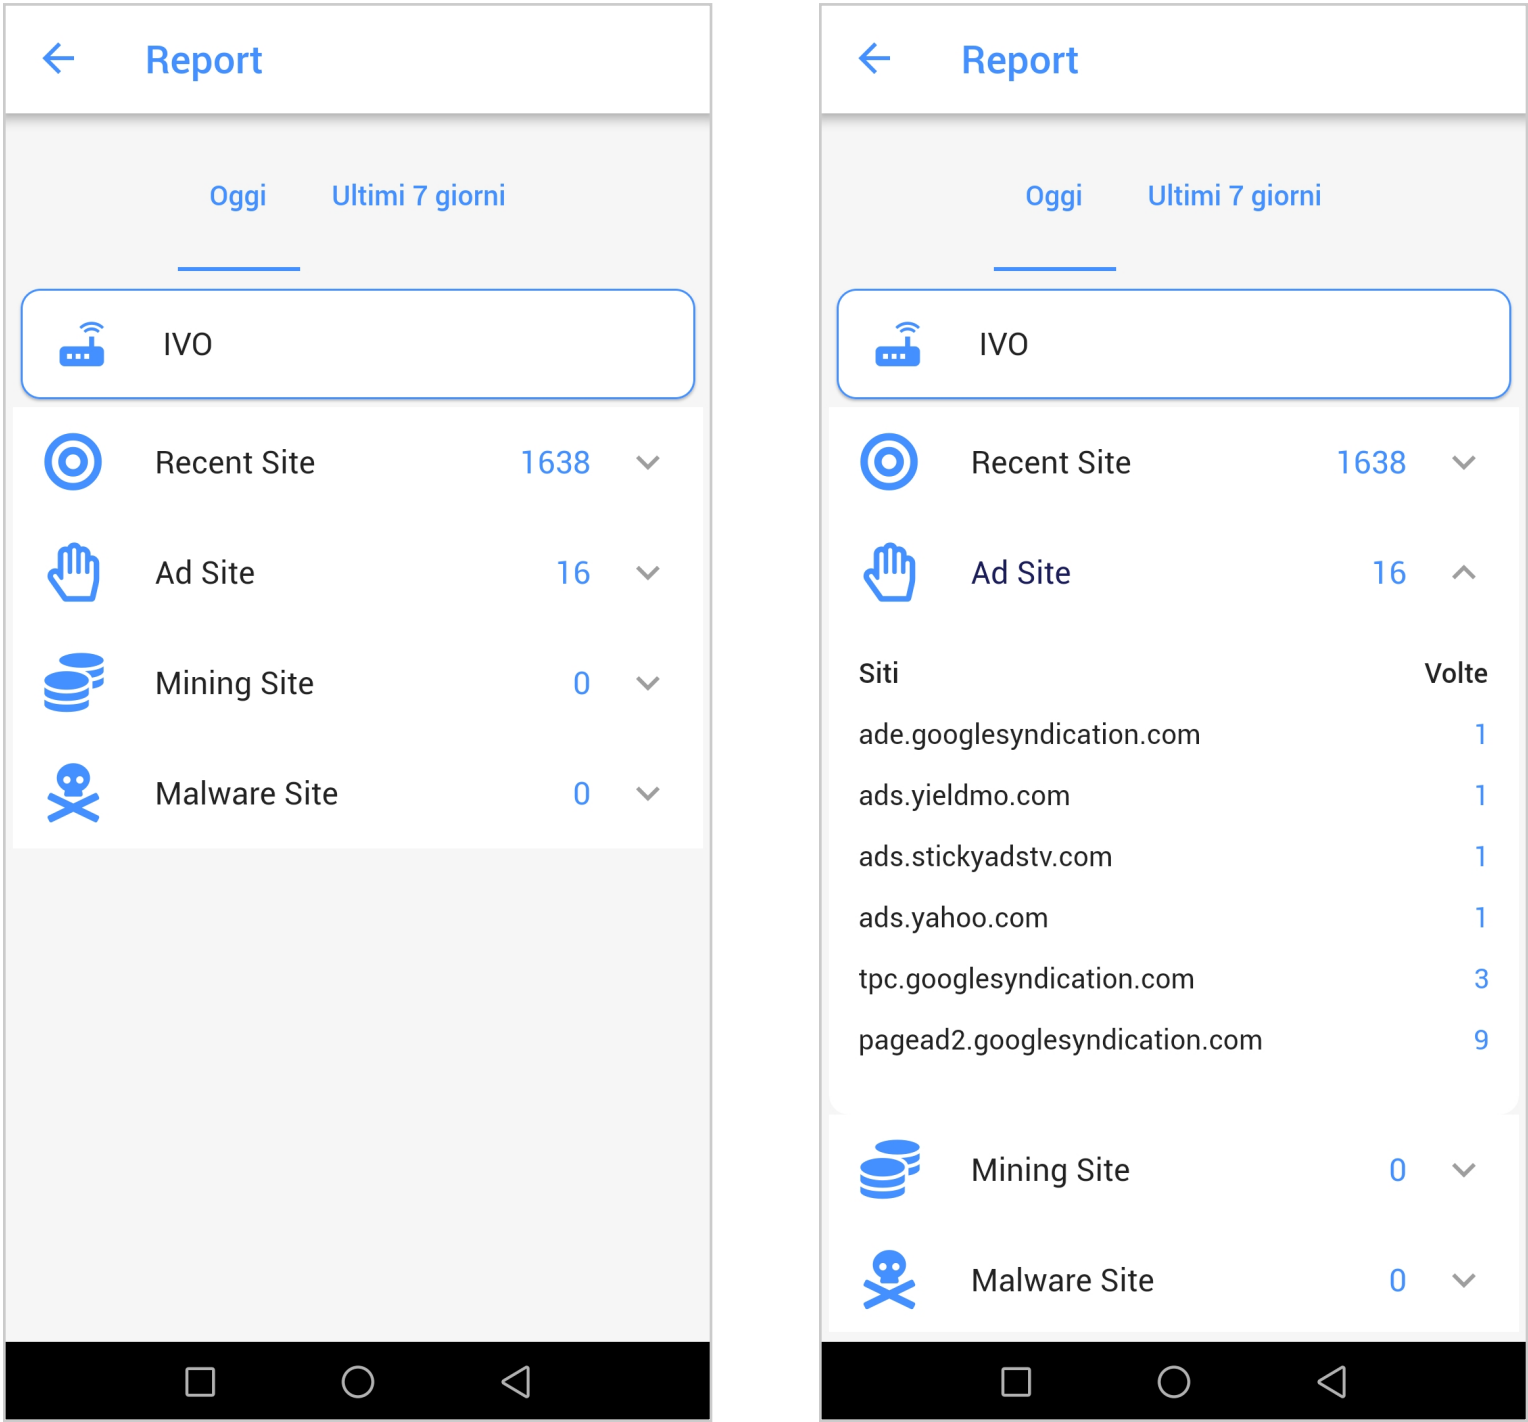

DEVICES

- In the toolbar black writings and blue icons
- Too much border radius
- The size of the container has been changed in height (on Avocode you can find the updated measures)
- Device icons always blue
- The font of the device name is larger than the line below
- Chevrons are grey

DEVICE DETAIL

- OK without icons!
- Too much border radius
- If we can put both name and description Ok otherwise if one of the two options is not possible they must be merged into a single form
- The button should be put larger
- Section titles go to "Roboto-medium".
- In the toolbar would go the name of the device that IVO has recognized not the MAC address

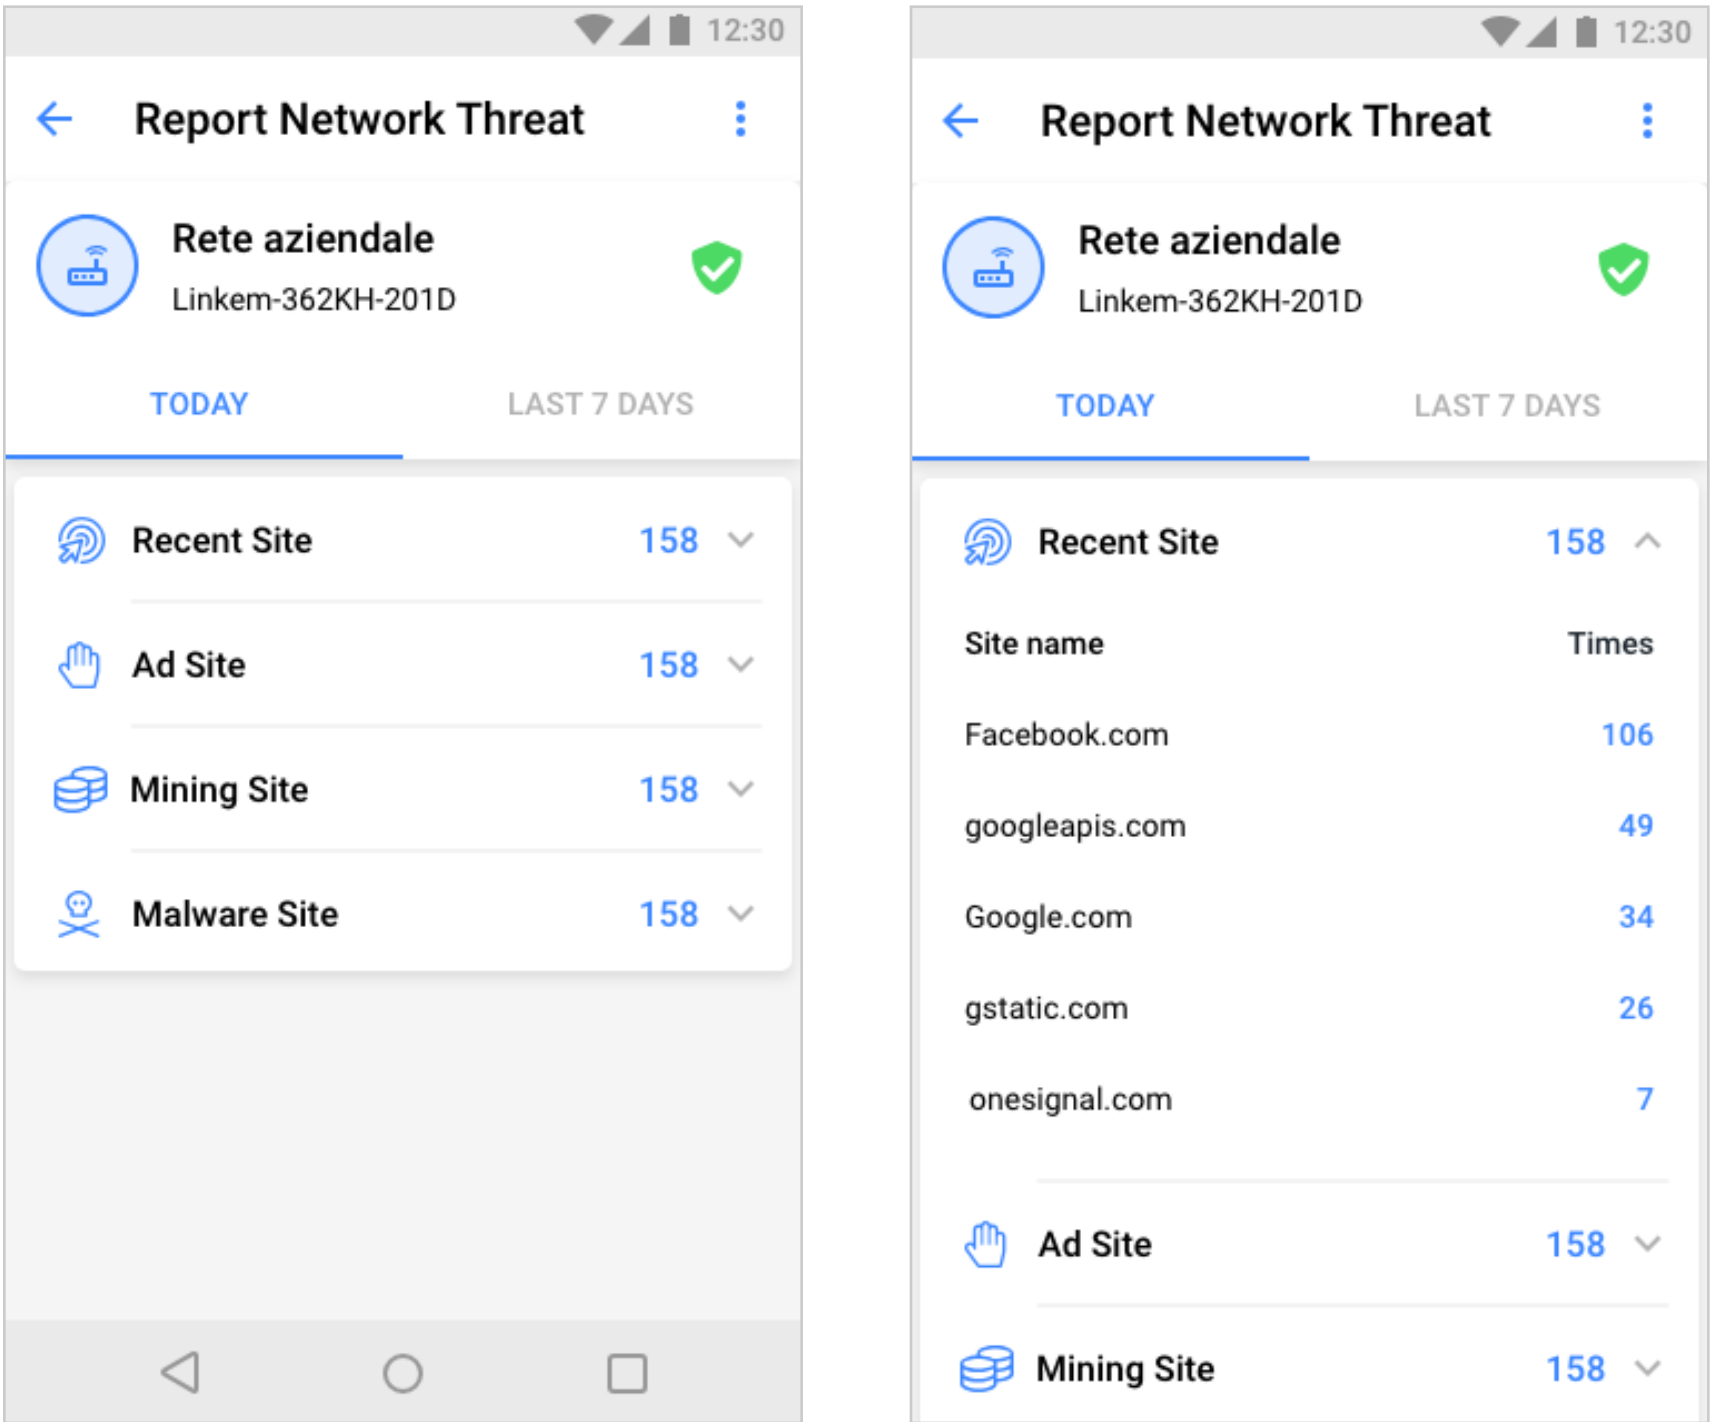

Produced

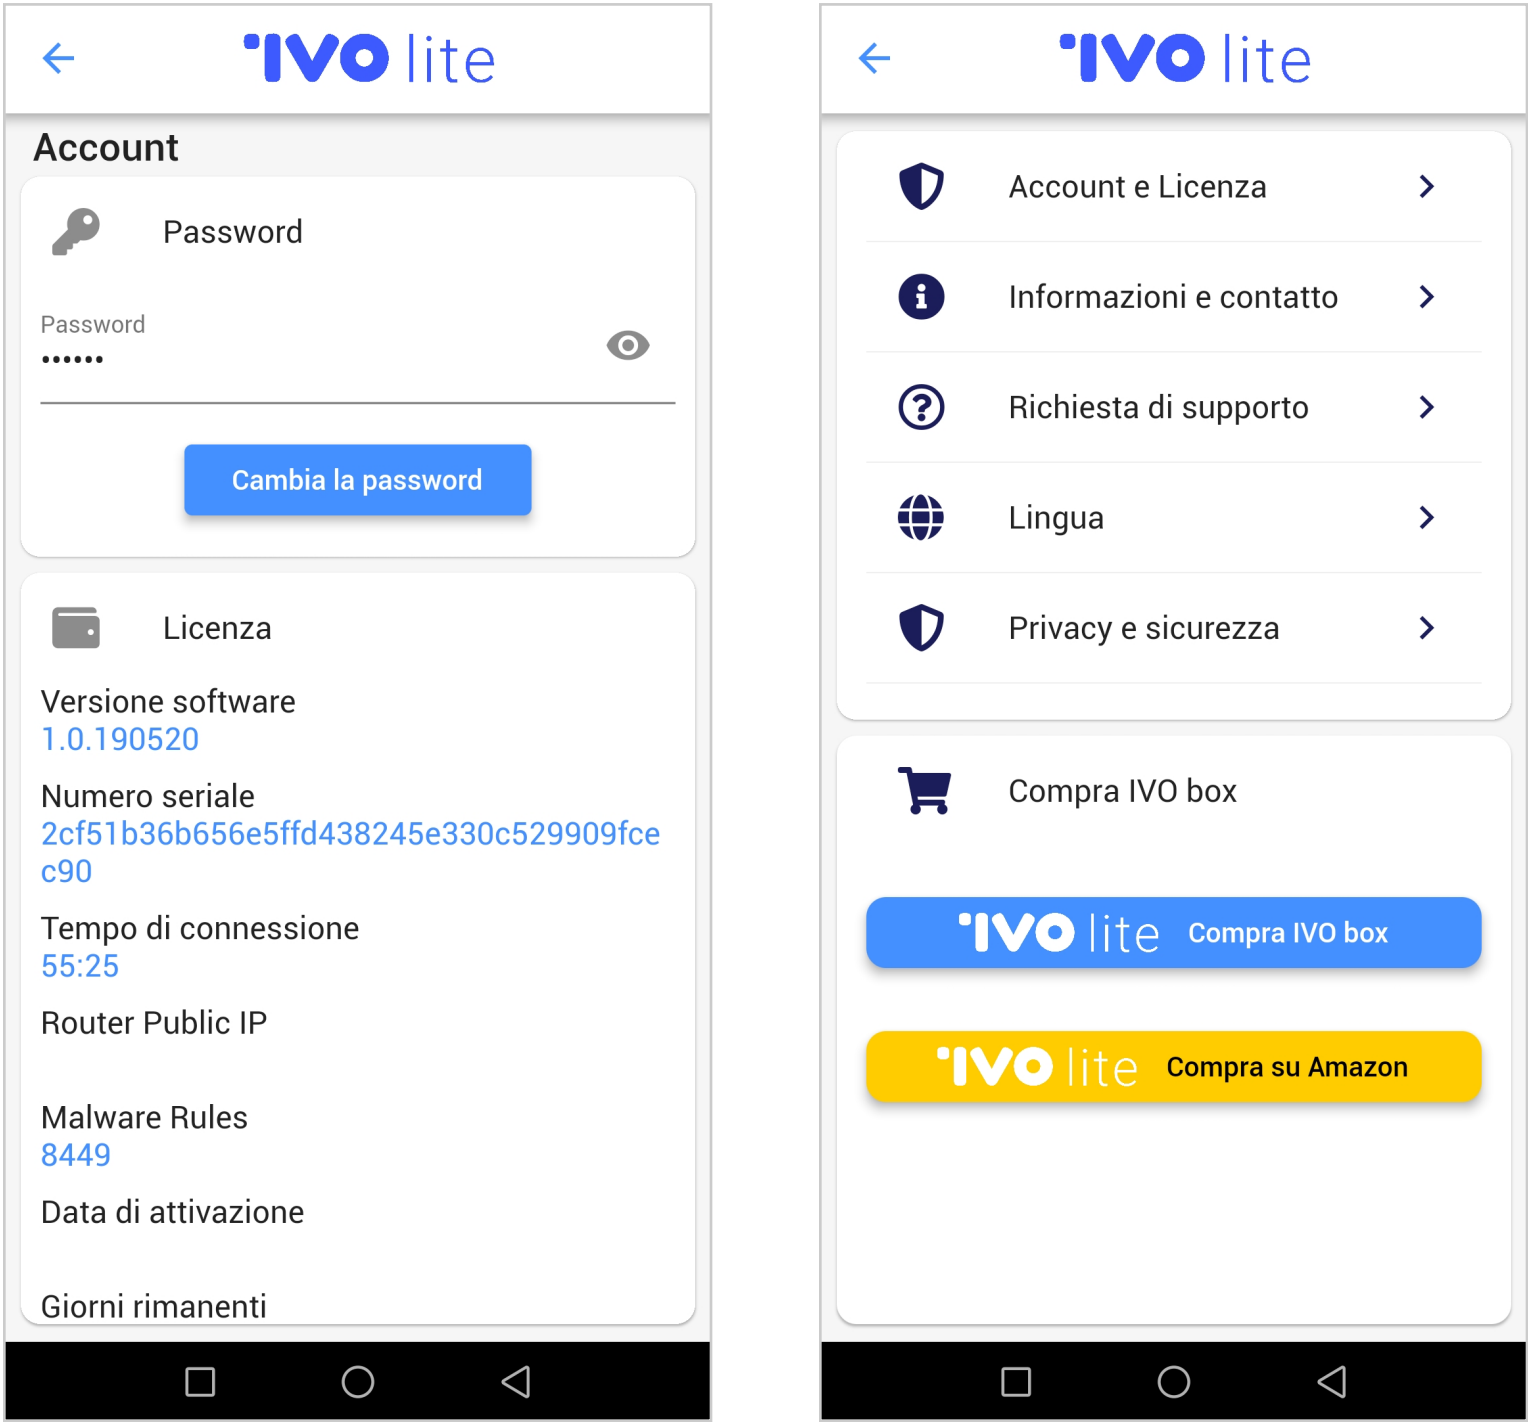

Corrections:

- The upper part containing the icon and the name of the network has been changed as in the figure (you can find the drawing on Avocode).
- Same as the previous corrections for the colors in the toolbar
- Fixing the tabs
- The same goes for icons that are full instead of empty. So either we buy the fontawesome package or we change them with material icons
- Categories have a divider
- The titles are sections are in “roboto-medium”

Original layout

Produced

Corrections:

- In the toolbar go the titles of the respective pages
- Empty icons
- Buy IVO box must be removed
